oventrop MADE IN GERMANY

Case study

Valves, controls + systems

“Regufloor HN”

“Cocon QTZ”

“Hydromat”

“Aquastrom VT”

OVENTROP SYSTEM SOLUTIONS MAKE THE GRADE

Oventrop Projects Division successfully designed, supplied, installed and commissioned a 2000m² Oventrop Cofloor underfloor heating system, at the new Cardiff and Vale College.

Oventrop “Cofloor” Tacker System was selected for its high output and flexibility. Each of the stainless steel manifolds were coupled to a “Regufloor HN” pump unit with blending and high limit control.

Oventrop also supplied “Cocon Q” PICVs, “Hydromat” DPCVs and TRVs for the remainder of the heating and “Aquastrom VT” thermal balancing valves for the hot water circulation.
