

GULLIVER'S WORLD THEME PARK

CASE STUDY

ILIFESTYLE WIFI ELECTRIC RADIATOR

“The App is amazing and allows me to monitor the radiators from anywhere, even at home to make sure my team are turning them off at the times I have requested.”

Helen Brown

Head of Guest Experience, Gulliver's World Theme Park

ILIFESTYLE WIFI ELECTRIC RADIATOR

CLIENT REQUIREMENTS

Gulliver's World Theme Parks have been providing magic to children for over 40 years - "from the fantastic fun at our theme parks and attractions, to great priced gifts and presents."

As part of this project, a new smart heating system was sought for both staff and visitor use.

This needed to be high performance and efficient, with controllability being at the heart of the requirements.

CLIENT FEEDBACK:

We spoke to Helen Brown, Head of Guest Experience at Gulliver's World Theme Park.

The iLifestyle radiators have been very beneficial. They warm the rooms a lot quicker than previous heaters, and look much more modern!

What are your favourite features?

1. The App is amazing and allows me to monitor them from anywhere, even at home to make sure my team are turning them off at the times I have requested.
2. Being able to view the costs, and not having to leave reception to go into a room to sort the heating. Accessing this via the App on the iPad enables staff to be more productive at work.

PRODUCT CRITERIA

- Install heaters area by area so as not to disturb visitors
- On-the-go WiFi controllability via App
- Simple to program and operate
- Full visibility of heaters
- 3 Operating Modes: Eco, Comfort & Frost Protection
- Triac Electronic Thermostat for silent operation

PRODUCT EVALUATED & CHOSEN

After examining the client's needs, the following products were installed:

- 24 x iLifestyle 750W Smart Electric Radiators
- 3 x iLifestyle 1500W Smart Electric Radiators
