

Lion Yard Shopping Centre Project

Lion Yard Shopping Centre
Saint Tibb's Row,
Cambridge
CB2 3ET

About the project

When it came to upgrading the canopy lighting in the 'Lion Yard' shopping centre Cambridge there was only one possibility, the ispot® LED driverless floodlight. The ispot® was chosen because of its unique, ultra thin stylish design and impressive light output. The ispot® incorporates innovative high voltage LED chips. These high voltage LED chips mean the ispot® doesn't require a driver therefore reducing the level of heat generated whilst increasing efficiency and reliability. The Lion Yard shopping centre acquired 67 of the ispot® 20Ws in white. The floodlights were distributed between the inside and outside of the building, with a full IP65 rating the ispot is the ideal choice for indoor and outdoor lighting. The Lion Yard opted for the daylight (5700K) version although a warm white option is also available. With an impressive 2100lm and 100° beam angle the ispot® 20W was an obvious choice.

Lion Yard Shopping Centre Project

What Lion Yard Had To Say?

Ken Foulkes | Operations Manager | Lion Yard Shopping Centre |

“The Brackenheath ispot[®] LED driverless flood lights were chosen for their sleek and slender lines as well as the lack of depth of the fitting, after all there is no heat transmitted from an LED so why do they all not have a slim back? We are very pleased with the appearance of the fittings, during the day but at night, they are like twinkling diamonds along our shopping mall.”
