

Integral LED Launches Precision Plus 2 Range of High-Performance Floodlights

Integral LED, a leader in innovative lighting solutions, is proud to announce the launch of its new Precision Plus 2 range of floodlights, designed to meet the demanding needs of perimeter lighting for loading areas, farm buildings, and grain stores. These floodlights are built to be highly resistant to the elements, ensuring reliable performance in challenging environments.

The Precision Plus 2 offers exceptional energy efficiency with an impressive 160lm/W, making them a cost-effective and environmentally friendly lighting solution. The robust design features a die-cast aluminium body paired with a durable polycarbonate lens, providing excellent protection against impact and weather conditions.

Key Features

Energy Efficient: Delivers 160lm/W for maximum light output with minimal energy consumption.

Durable Construction: Die-cast aluminium body and polycarbonate lens ensure long-lasting performance.

Food Safety: The polycarbonate optic is ideal for areas where glass is restricted, preventing potential food contamination.

Weatherproof: IP65 Ingress Protection rating guarantees resistance to dust and water.

Impact Resistant: IK08 rating ensures the floodlights can withstand significant impact.

Easy Installation: Pre-wired with a 1m rubberised flex for straightforward setup.

Extended Warranty: Backed by a 5-year warranty for peace of mind.

"Our new Precision Plus 2 range combines durability, efficiency, and safety, making it an ideal choice for a variety of applications," said Richard Turner, Director of Product Management and Compliance at Integral LED. "Whether it's for enhancing security in loading areas or ensuring safe operations in farm buildings, these floodlights deliver outstanding performance and value."

The Precision Plus 2 range is available now and can be explored in detail on our website:
