

Rointe introduces new electric water heating range for the 2019 heating season

At Rointe, we believe that everyone needs efficient and affordable heating and it gives us great satisfaction to offer a wide range of energy efficient, digital products that fit our customers' need for warmth and comfort. That's why we have introduced a new and exciting range of water heaters for 2019..

Our new range of innovative [unvented water heaters](#) are the ideal solution to meet your domestic hot water needs. With five new advanced products including connected, digital, compact and instant along with an aerothermal heat pump, ranging from energy class A to C. Our new collection provides maximum comfort combined with energy efficiency.

- **Rome connected**

The new low consumption [Rome connected](#) is an unvented water heater with a C energy classification and built-in Wi-Fi for complete control using your smartphone. You can adjust temperatures and view your real-time consumption along with costs anytime, anywhere using the free [Rointe Connect app](#).

The new Rome connected is a digital solution that also includes important safety functions like an exclusive thermal break system and an anti-legionella function (designed to protect the heating system against this harmful bacteria).

Available in two models: [80 litres](#) and [150 litres](#). Other features include a ceramic heating element; touch control panel and Anti-frost/Eco/Comfort modes. Guarantee details: 5 years on the tank and 2 years on all other parts (when you register your product).

- **Siena digital**

The [Siena digital](#) is an electric unvented water heater with four pre-installed programs, designed to make life easier. These exclusive editable programs will keep your installation perfectly programmed at the push of a button and can be adjusted to meet your needs. Interactive visual menus and infrared communication make programming simple.

The new Siena digital combines advanced technology with a ceramic heating element and an enamelled steel tank. Available in two models: [80 litres](#) and [150 litres](#). Other features include Anti-frost/Eco/Comfort modes, touch control panel and an anti-legionella function.

Guarantee details: 5 years on the tank and 2 years on all other parts (when you register your product).

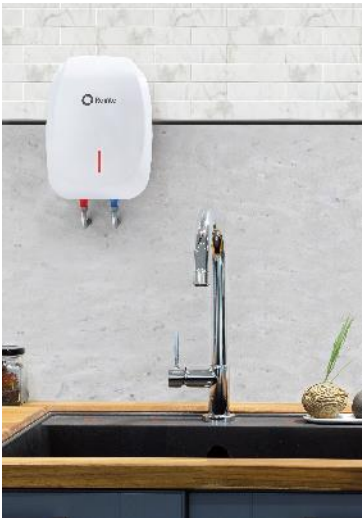

- **Venice compact**

At only 41cm in height, the new [Venice compact water heater](#) is perfect for residential and commercial properties and with an energy rating of B, it is an efficient way to add hot water to your sink.

There are two versions to choose from, outputs on the top or bottom, so you can choose the solution that best meets your needs. The Venice compact includes an external thermal regulator and an enamelled steel tank with a submerged copper heating element.

Available in four models: [10 litres \(output on bottom\)](#), [10 litres \(output on top\)](#), [15 litres \(output on bottom\)](#) and [15 litres \(output on top\)](#). Other features include a magnesium anode protector, safety valve and a modern white and black finish.

Guarantee details: 2 years (when you register your product).

- **Capri instant**

The new [Capri instant water heater](#) has an energy rating of A and provides instant hot water to your sink. It can be mounted in any position thanks to 360° installation, has a compact size and is a lightweight, tankless solution.

Suitable for domestic and commercial use, the new Capri instant water heater includes water temperature stabilisation, overheating protection and a working light indicator. Guarantee details: 2 years (when you register your product).

Available in two models: [4 litres/minute](#) and [4.6 litres/minute](#).

- **Dalis heat pump**

The new [Dalis heat pump and storage tank](#) is an “all in one” solution for domestic hot water. An aérothermal system that extracts heat from the air outside to provide hot water for your home. A high-technology rotational compressor ensures better energy efficiency for an A energy rating.

The new Dalis heat pump is a virtually silent system with low noise emission and is available in four models: [200 litres \(with exchanger\)](#), [260 litres \(with exchanger\)](#), [200 litres \(without exchanger\)](#) and [260 litres \(without exchanger\)](#).

Other features include an automatic defrost system, anti-legionella function and a thermal circuit breaker with auto reset. Guarantee details: 5 years on the tank and 2 years on all other parts (when you register your product).

When it comes to finding **electric heating solutions** for your home, business or project, **we are the best in the market**. Our success is guided by over 30 years of experience and our commitment to innovation and quality.
