

TOTTENHAM HOTSPUR STADIUM - VIP AREA

CASE STUDY

HIGH TEMPERATURE CEILING HEATERS

"It was a pleasure to work with ATC on this project - the product installation was quick and simple, making the whole process straightforward!"

Paul Parker,
C.E.F. Maidstone North

CLIENT REQUIREMENTS

Tottenham Hotspur Stadium is the ultimate sports and leisure destination in London, with a capacity for 62,850 people.

After undergoing a complete redesign in 2019, Tottenham Stadium sought an energy efficient yet effective heating system for its new VIP area and bars.

It was essential that this heating system was equipped to comfortably heat both the areas and the people within.

PRODUCT CRITERIA

- Energy efficient, with low energy costs
- Quick installation to allow for day-to-day running of matches and non-sporting events
- Draught and noise free
- Attractive finish to seamlessly blend with and complement the interior design

PRODUCT EVALUATED & CHOSEN

After a heating design evaluation by our technical team, it was decided that the following products would be installed:

- 99 x 3.6Kw High Temperature Ceiling Heaters
