

Preinsulated Crimps Blue

1.5mm² - 2.5mm² – 8A

All terminals are made from oxygen-free high conductivity copper. Our ring, fork, butt, pin and blade terminals are then electro-tin plated for excellent conductivity and resistance to corrosion. Push-on terminals are made from brass, while the insulated types benefit from an additional internal copper sleeve, ensuring insulation support and a good crimp joint.

Maximum working temperature +75°C.

Most terminals are UL and CSA approved. Please check for specific approval.
