Thermo fluid radiator

Maximum Power (W)	Width (mm)	Height (mm)	Depth (mm)	Part No.
500W	335	575	95	ASCOT0500WF
500W (Wi-Fi)	335	575	95	ASCOT0500WF/WIFI

Our smallest within the range, ideal for a small boost of heat when you need to keep that draft away. Perfect for any rooms 8m2 and under.

Commonly used

ASCOT0500WF is perfect for your more confined areas where just enough heat is lost to require a boost of heat. Small in size, boasting only three fins, this heater is very popular in hallways, small bedrooms and utility rooms. It is also common to see this heater used in large rooms to add that little bit of heat that you thought you didn't need on first installation.

The petite size of this heater makes it portable. It is very popular to see this product being used to transfer around a property as it can be placed on feet or wheels. ASCOT0500WF is the most flexible within the range.
