# Technical section EMI screen system & fire performance

### **EMI Screen System**

For applications where electromagnetic interference is of particular concern we have classified suitable conduit systems by means of symbols. These are related in an ascending scale of performance from Standard EMI Screen (products featuring a stainless steel overbraid) through to High EMI Screen (products featuring a tinned copper overbraid). Contact us for full details.

Standard EMI Screen Screening Level 40db @ 100MHz

Enhanced EMI Screen Screening Level 60db @ 100MHz

High EMI Screen Screening Level 75db @ 100MHz

#### **Fire Performance**

Adaptaflex has introduced a set of symbols to help the user specify conduit systems for installations where fire performance is of particular concern.

Each symbol encompasses a range of properties relevant to the high specification materials used in the construction of the conduit.

They are in an ascending scale of performance from Low Fire Hazard (LFH) featuring zero halogen through to Super Low Fire Hazard (SLFH) featuring zero nitrogen. In addition, Inherent Low Fire Hazard systems (ILFH) are classified as being all metal systems.

Low Fire Hazard

Enhanced Low Fire Hazard

Super Low Fire Hazard 8

Inherent Low Fire Hazard

| Property                             | LFH              | ELFH              | SLFH            | ILFH                 |
|--------------------------------------|------------------|-------------------|-----------------|----------------------|
| Oxygen Index ISO4589                 | 31% ≥ OI ≥ 28%   | OI ≥ 32%          | OI ≥ 32%        | Inherent Low         |
| BS6853 Smoke Density 3m <sup>3</sup> | 0.02 ≥ A0 ≥ 0.03 | 0.005 ≥ A0 ≥ 0.02 | 0.02 A0 ≤ 0.005 | Fire Hazard          |
| Zero Halogen                         | •                | •                 | •               | i.e. Type S, SS, SPB |

# Technical section IP ratings & fitting characteristics

# **IP** Ratings

IP suitability ratings are a system for classifying the degree of protection provided by enclosures of electrical equipment.

# **Protection against Solid Bodies**

Degree of protection for persons against access to hazardous parts inside the enclosure and/or against the ingress of solid foreign objects.

### **Protection against Water**

Degree of protection of equipment inside enclosures against damage from the ingress of water.

| 4        | 0 | No protection  | 6          | 0 | No protection  |
|----------|---|--|------------|---|--|
|          | 1 | Objects greater than 50 mm, accidental touch by hands          |            | 1 | Protected against vertically falling drops of water  |
|          | 2 | Objects greater than 12 mm, accidental touch by fingers        | K          | 2 | Protected against direct sprays of water up to 15° from vertical                                   |
| <b>B</b> | 3 | Objects greater than 2.5 mm,<br>e.g. tools/wires               |            | 3 | Protected against sprays of water to 60° from vertical   |
|          | 4 | Objects greater than 1 mm,<br>e.g. tools/wires/small wires     |            | 4 | Protected against water sprayed from all directions - limited ingress permitted                    |
|          | 5 | Protected against dust - limited ingress (no harmful deposits) |            | 5 | Protected against low pressure jets of water from all directions - limited ingress permitted       |
|          | 6 | Totally protected against dust<br>(Dust-tight)                 |            | 6 | Protected against strong pressure jets<br>of water, heavy seas - limited ingress<br>permitted      |
|          |   |  | <b>F</b> : | 7 | Protection against the effects of immersion between 15cm - 1 m                                     |
|          |   |  | <b>F</b> : | 8 | Protection against long periods of<br>immersion under a quoted pressure,<br>e.g. 2 bar at 24 hours |
|          |   |  |            | 9 | IP69k Automotive standard DIN40050 and signifies resistance to high                                |

pressure jets of water (up to 80bar) from any angle

#### **IP Ratings**

The higher the number, the greater the degree of protection; they apply ONLY to properly installed equipment. The numerals stand for the following:

# **Fitting Characteristics**

# Technical section Chemical resistance

### **Chemical Resistance Comparison Table**

#### Note

The information above is given as a guide only and is based on published technical data and experience.

The chemical resistance of the above products is dependant on factors such as chemical exposure, concentration of the chemical and temperature. The above chemicals are valid for a temperature of 23°C.

Use of the above table is at the users own discretion and risk. Those using it must satisfy themselves that their application presents no health and safety risks.

The end user should assess compatibility with their application and contact Adaptaflex for further information.

NT

# Technical section Cable carrying capacity (wire fill)

#### Introduction

UK Wiring regulations BS7671 recommend that the total cross sectional area of the sum of individual cables shall not exceed 40% of the cross sectional area of the conduit based on using 3 or more cables. The tables below enable youto calculate the number of conductors that can be run within a piece of flexible conduit.

#### Instructions

- **Step 1:** Establish the number and size of each wire to be run in the conduit
- Step 2: Look on the Cross Sectional Area (CSA) chart (table 1), look up the CSA taken up by each of the wires from STEP 1
- Step 3: Add all the CSA values together (Total CSA)
- Step 4: Look on the conduit fill value chart (table 2).
- Choose a conduit with a 40% fill value higher than the total CSA from STEP 3

|                        |      |       |       | Number | of Wires |      |       |      |  |
|------------------------|------|-------|-------|--------|----------|------|-------|------|--|
| Nominal Conductor Size | 1    | 2     | 3     | 4      | 5        | 10   | 15    | 20   |  |
| 1mm                    | 6.6  | 13.2  | 19.8  | 26.4   | 33       | 66   | 99    | 132  |  |
| 1.5mm                  | 7.6  | 15.2  | 22.8  | 30.4   | 38       | 76   | 114   | 152  |  |
| 2.5mm                  | 9.6  | 19.2  | 28.8  | 38.4   | 48       | 96   | 144   | 192  |  |
| 4mm                    | 14.5 | 29    | 43.5  | 58     | 72.5     | 145  | 217.5 | 290  |  |

#### Table 1 - Cross Sectional Area (CSA) Chart

#### Table 2 - Wire Fill of Plastic & Metallic Conduit

|                  | Plastic Conduit |          | Metallic Condu |          |  |
|------------------|-----------------|----------|----------------|----------|--|
| Nominal Diameter | 100% Fill       | 40% Fill | 100% Fill      | 40% Fill |  |
| 10mm             | 33.2            | 13       | 25.5           | 10.2     |  |
| 13mm             | 72.4            | 29       | 58.1           | 23.2     |  |
| 16mm             | 109.4           | 44       | 83.3           | 33.3     |  |
| 18mm             | 158.4           | 63       | 160.6          | 64.2     |  |
| 21mm             | 213.8           | 86       | 243.3          | 97.3     |  |
| 28mm             | 369.8           | 148      | 452.4          | 181      |  |
| 34mm             | 602.6           | 241      | 855.3          | 342.1    |  |
| 42mm             | 973.1           | 390      | 1164.2         | 465.7    |  |
| 54mm             | 1698.2          | 680      | 1963.5         | 785.4    |  |
| 80mm             | 3520            | 1410     | 3473.2         | 1389.3   |  |
| 106mm            | 6500            | 2600     |                |          |  |

#### Example - What size of conduit to use?

- Step 1: 4 x 2.5mm conductors, 2 x 10mm conductors and 3 x 50mm conductors
- Step 2: The CSA of Four 2.5mm conductors is 38.4, Two
  10mm conductors is 58.6, Three 50mm conductors is 339
- **Step 3:** Total of these groups is 38.4 + 58.6 + 339 = 436
- Step 4: Using Table 2 the conduit is either 54mm (680)
  Plastic or 50mm (465.7) Metallic
- Note: 42mm Plastic is 390 which is smaller than 436 therefore not recommended

The information given above relates to PA - Standard weight conduit and Adaptalok fittings or SPL with M-Type fittings. It is given in good faith and should be used only as a guide in conjunction with the relevant wiring regulations.
