

Lo-Carbon Revive/SELV

- Designed to exceed the needs of Social Housing
- Continuous running bathroom and kitchen fan
- Extracts up to 60l/s - just two fans can exceed Part F rates for a 4-bed house
- 5 or 7 year warranty options
- High performance on trickle to avoid going to boost too often
- Intelligent Smart Sense™ data logging technology tells you days run, boost hours run, energy used
- Innovative Multi-Vortex technology ensures high performance but low sound and energy levels
- Small footprint with optional decoration frame
- Unique settings lock to prevent tampering

Designed for Social Housing

The award winning, intelligent Lo-Carbon Revive is a new filter-less unitary fan designed to meet the specific needs of social housing. Boasting powerful, quiet, efficient ventilation, Revive provides good indoor air quality and comfort for residents while being quick and easy to install, low maintenance and reliable.

Smart Sense™ Technology

Featuring Smart Sense™ intelligent technology Revive is quick and easy to install due to its simple alpha numeric LED display which is clear, easy to read and has a three-button menu for commissioning and data gathering. Smart Sense™ technology even tells the LED display which orientation to use depending on whether it is wall or ceiling mounted. All of which saves time on site and reduces installation complications. The Revive is the only fan in the market with a unique setting lock to prevent tampering with the unit giving the landlords peace of mind.

The display also shows real-time data so landlords can reassure residents of the low-running costs. This includes data such as days run, hours on trickle or boost, and even more specifically, hours run on boost triggered by the humidity sensor. Revive can also tell you how much energy the fan has used.

Multi-Vortex™ Technology

Revive is low maintenance since its market-leading Multi-Vortex™ technology does not require a filter, while the highly sculpted interior actively repels dust, avoiding clogging, thus helping to avoid call backs. In addition the Multi-Vortex™ technology has a high-pressure hybrid impeller that is powerful and efficient, yet quiet - everything you need for the Social Housing resident.

Multiple configuration options

Revive can extract up to 60l/s from a kitchen - just two fans can exceed Part F rates for a 4-bed house. Upon installation you have the choice to change the setting to allow for installation in a bathroom. The installer can also select a ducted mode or a through the wall mode. All selected via the intuitive LED display.

Intelligent Humidity Sensing and Controls

It is essential to capture moisture at the source before it can migrate to the rest of the property. However over-ventilating with crude humidity controls can cause excessive noise and discomfort to the resident. The Lo-Carbon Revive range utilises advanced humidity controls which boost in line with the detected humidity levels and whether they are rising or declining. This allows it to effectively deal with moisture, while minimising noise.

Models

Lo-Carbon Revive 7/SELV 7

A universal kitchen or bathroom HTP fan with options to be continuous running or intermittent. Adjustable trickle speed between 6-13l/s and boost speeds of 15, 30 and 60. Day logger and power run meter as standard. 7 year warranty. Built-in lock function. Adjustable dynamic ambient response humidity sensor. Timer adjustable between 1 and 30 minutes. In built boost activated by pullcord, humidity sensor, switched live or remote button. Tile front for discreet installation.
