Fuse Combination Switches 20 - 800A

Characteristics

- Provides individual protection and control of circuits.
- Enclosures up to 100A have been designed to provide adequate cabling space without the need for additional cable
- Operation of the device is through a door mounted rotary handle which is mechanically interlocked to prevent access to live conductors when the switch is in the on position. The handle is padlockable in the off position.
- All versions will accept standard BS 88 fuse links and can be converted to switch disconnector by fitting copper links.

Utilisation category

- AC22B - 630 - 800A - AC23A - 20 - 630A

- **Product features**
- Conforms to: BS EN 60947-3 - Rated IP31.

Note: Maximum rated fuse links are fitted in all fuse combination switches.

Note: Copper links for conversion to isolating switches

- For dimensions see page 88.

- For technical information see page 89.
