e-autoprogram technology

ULTRAD: THE ULTRA-SMART ELECTRIC RADIATOR

A WORLD-FIRST RADIANT HEATING SYSTEM THAT CAN INTELLIGENTLY PROGRAM ITSELF

For ultimate flexibility and comfort. Control via an app from anywhere in the world – or let it control itself, detecting presence in a room and adjusting its temperature, reducing energy consumption

HAYERLAND®

ENERGY SAVING INTELLIGENT HEATING

ULTRAD combines unique sensor technology with innovative heating technology to deliver maximum control and comfort for users with minimal hassle for installers. With no set-up or date and time programming required, ULTRAD is the perfect solution for the modern lifestyle.

INTELLIGENT, SELF-PROGRAMMING CAPABILITY

Thanks to innovative, built-in motion sensing sensor technology, ULTRAD knows when someone is in the room and intelligently sets itself to the ideal temperature. If no movement has been detected for a predetermined period, ULTRAD automatically reduces the temperature to an economy setting, minimising energy consumption and reducing costs.

Setup is simple. There's no need for programming. During its first week of operation, ULTRAD recognises patterns when each room is in use, creating daily programs and then automatically adjusting its settings so that each room is at the perfect temperature before each room is occupied. ULTRAD then learns continuously, repeating its automatic daily and weekly cycles, while adapting to changes in lifestyle.

ULTRAD offers ultimate flexibility with several programming options to choose from: including the options to control it from anywhere in the world using an app – or to simply let it learn and control itself!

BENEFITS

For users:

- Flexible: multiple control options, plus smartphone, tablet or PC/Mac remote control
- Detects movement: knows when you're in a room and when you're not
- Learns when you use a room within 1st week of installation and learns continuously
- Heats up automatically so the room is a comfortable temperature when you arrive
- Detects how long a room has been empty and lowers its temperature to an economy, then anti-frost setting
- Reduces energy, saves money
- Modern, sleek design
- No Portable Appliance Testing (PAT) or maintenance required

For installers:

- No set up, configuration or programming required!
- Fast and easy installation
- Minimum tools required
- Wall mounting brackets included
- Template supplied to ensure correct height and positioning
- Auto time and date recognition from switch on
- 5 models ranging from 500-1500 watts

For wholesalers:

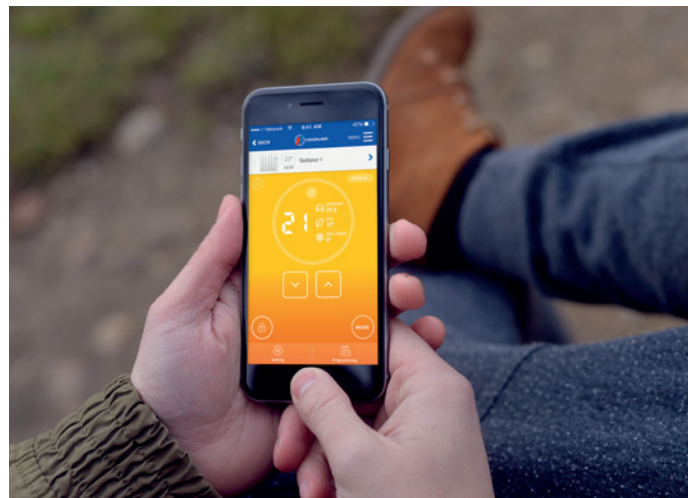

- A world-first: the future of smart electric radiators
- Easy to sell with significant market opportunity
- Ideal for all applications
- Wide range of simple control options
- Safe for children and the elderly thanks to in-built thermal safety limiter
- 10 year radiator block seal guarantee
- 3 year electronic guarantee
- Packaged ready to display to customers
- UK based team for training and support

SMART CONTROLS, ULTRA FLEXIBILITY

Our easy to use app for smartphones, tablets, PCs /MACs and specially designed Smart Box system will enable you to change the temperature setting or mode your ULTRAD from anywhere in the world, at anytime.

- Override any set programs remotely and fully customise your heating by room
- Set your ideal temperature for each hour of each day
- Control each ULTRAD individually
- Remotely adjust the settings of all installed ULTRADs – at the same time

PRODUCT RANGE SPECIFICATIONS

MODELS	Rating (W)	Dimensions L x D x H (mm)	Weight (kg)	Elements
ULTRAD - 3	500	422 x 100 x 582	5.5 kg	3
ULTRAD - 5	750	622 x 100 x 582	8.0 kg	5
ULTRAD - 6	1000	722 x 100 x 582	10.5 kg	6
ULTRAD - 8	1250	922 x 100 x 582	13.0 kg	8
ULTRAD - 9	1500	1022 x 100 x 582	16.0 kg	9
