

**Perfect for.....  
Sharp and strong high performance  
cable cutting**

- A Dual heat treatment process** gives the optimum strength required at specific parts of the tool for excellent durability
- B Extremely sharp ground cutting edge** rapidly cuts through wire and cable for a clean and accurate finish
- C Forged Chrome Vanadium body** gives extreme strength with cutting edges that stay sharper for longer
- D Milled and polished blade surfaces** provide a smooth and easy to use tool
- E 8" (210mm) PVC coated handles** provide added grip and leverage for user comfort and ease of use

**Cable Cutters can be used to cut:**

- Copper Wire
- Plastic Sheathed Cable
- Aluminium Wire
- Optical Cable
- Co-axial Wire – RG58 / RG59 / RG6
- Not suitable for iron or steel wire

**DID YOU KNOW?**

Our Cable Cutters are manufactured to DIN ISO 5743

**Cable Cutters are ideal for:**

- Domestic and industrial cable installation
- TV & Satellite cable installation

**TECH TIP!**

When cutting try not to twist the cutter from side to side, this will prematurely dull the blades and result in an uneven cut

**Cable Cutters**

Description	Technical Information	Part Number
8" (210mm) Cable Cutters - carbon steel	Capacity: 35mm <sup>2</sup> 11mm diameter	DCC8001
