

Perfect for.....
Rapidly producing square holes
in plaster and dry lining

A Ergonomically designed handle combines constructional strength with soft grip touch for the ultimate user comfort experience

B Flared handle profile minimises chance of accidental injury by preventing hands slipping towards the sharp cutting edge

C 1.8mm blade construction manufactured with fully hardened, high carbon steel produces a stable sawing action and ultimate tool durability

D Dual ground teeth at a perfect 7 TPI ratio provides an aggressive sawing action on both the push and pull strokes for extreme speed and fast hole production

E 15mm straight 'punch tip' blade punches through materials prior to sawing enabling immediate cutting for a hassle free and time saving start up

EBS Board Saw can be used on:

- Plaster board
- Wood
- Plaster
- Similar materials

EBS Board Saw is ideal for:

- Cutting out square holes in plasterboard walls for electrical back boxes
- Cutting holes in plasterboard ceilings for access or downlight installation
- Cutting to size plasterboard sheets

EBS Board Saw

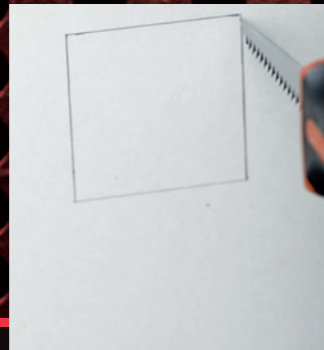

Description	TPI (Teeth Per Inch)	Overall Length mm	Part Number
EBS Board Saw - 150mm	7 TPI	150	EBSBS150

DID YOU KNOW?

The EBS Board Saw comes with a protective blade cover for added safety and blade and tool protection

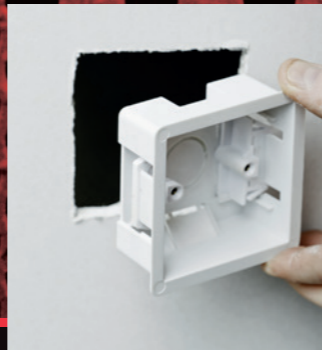

Punch

Cut

Done

TECH TIP!

For a better finish apply more force on the push stroke rather than the pull stroke
