

UNIVERSAL 360° PIR PRESENSE DETECTOR

This universal sensor can be recessed or surface mounted using the kit included

It not only detects motion, but occupancy or presence

The sensor is designed such that detection becomes more sensitive, the closer the movement is to the centre of the detection pattern

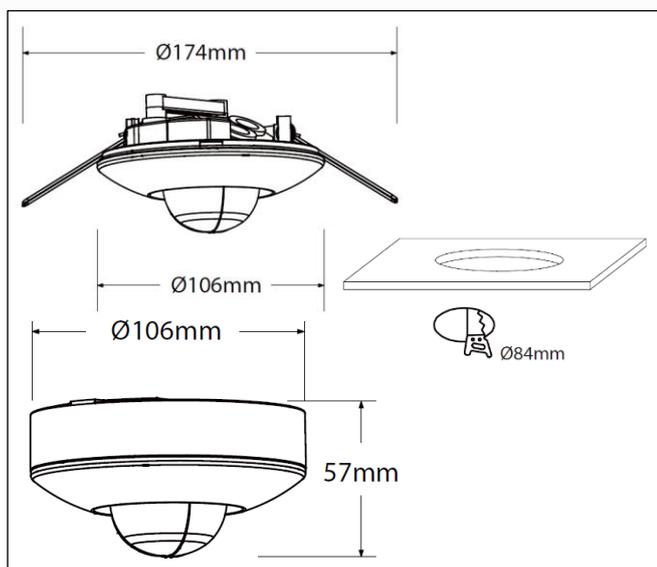

This makes it ideal for desk based presence detection as well as for corridors where larger movements are made

It also has a high switching capacity of 800W for LED loads so can switch as many fittings as you would expect to have in its detection area
