28.0	450	400	9SX28.0X450

Recommended speed for SDS Plus is largely governed by the power tool itself. This is because the product is designed to be used in power tools where in the majority of cases there is no facility to

regulate the speed (i.e. SDS Plus machines). If used in a machine where speed regulation is possible, a general recommendation is the larger diameter of the drill bit being used, the slower the speed.

When used with relevant adaptor - QFMX

Have you tried? **SDS Max**

Provides a heavy duty option for diameters over 12mm
