Product selector...

Simply choose the material you need to drill and use our rating guide to choose which is the best tool for you.

The Armeg Masonry Core drilling range offers the most comprehensive choice of masonry core drills available. With diameter options from 22mm to 152mm and drilling depths ranging from 60mm to 300mm, it is a hugely versatile range. All masonry materials can be drilled from soft blocks right through to concrete and engineering brick.
