BOSCH

Invented for life

Jigsawing, sabre sawing, multi-cutters, holesawing

BOSCH

Invented for life

Accessory range

Overview

Innovative and efficient products ensure successful sales.

The research and development departments at Bosch work to continuously develop and optimise accessories in line with the needs of professionals.

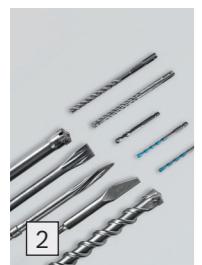

The metal drill bit range

Metal and wood drilling
Accessories for screwdriving
Machine accessories
Cordless working
Work safety

The circular saw blade range

Circular sawing
Routing

The concrete and masonry range

Hammer drilling
Masonry drilling
Chiselling

The jigsaw blade range

Jigsawing
Sabre sawing
Multi-cutters
Holesawing

The diamond accessory range

Diamond cutting
Diamond grinding
Diamond drilling

The abrasives range

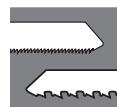

Sanding and polishing
Cutting
Grinding and brushing

Bosch Customer Service

Jigsawing

Grey – for wood

The product name describes the characteristics	The features	The blade quality	
basic  Wood	Good and cost-effective	HCS, milled	
speed  Wood	For fast cuts	HCS, ground	
clean  Wood	Fine and clean cuts	HCS, ground	
extra-clean  Wood	Tear-free cuts in wood	HCS, ground	
precision  Wood	Exact cutting at accurate angles	HCS, ground	
PROGRESSOR  Wood	Fast through thick and thin	HCS, ground	
speed  HardWood	For quick cuts, also in hardwood	BIM, ground	
clean  HardWood	For fine cuts, also in hardwood	BIM, ground	
extra-clean  HardWood	Tear-free cuts in wood, also in hardwood	BIM, ground	
precision  HardWood	Exact cutting at accurate angles	BIM, ground	
special  Laminate	For precise, clean cuts in laminate	BIM, ground	

Red – for plastics

The product name describes the characteristics	The features	The blade quality	
clean  PP	Clean cuts in PP and PE	HCS, ground	
clean  PVC	Clean cuts in PVC, PA, PS	HCS, ground	
clean  PMMA	Clean cuts in PMMA	BIM, ground	
clean  PC	Clean cuts in PC	HSS, ground	
clean  CarbonFiber	Clean cuts in CRP, GRP	Tungsten carbide, ground	
clean  SolidSurface	Clean cuts in Solid Surface plastics	Tungsten carbide, ground	

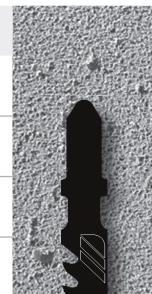

Blue – for metal

The product name describes the characteristics	The features	The blade quality	
basic for Metal	Good and cost-effective	HSS, milled	
basic for Inox	Good and cost-effective for stainless steel	BIM, milled	
flexible for Metal	Breakproof, long lifetime	BIM, milled	
speed for Metal	Fast, breakproof, long lifetime	BIM, milled	
precision MetalSandwich	Exact cutting at accurate angles	BIM, milled	
flexible for Metal-Sandwich	Breakproof, long lifetime	BIM, milled	
PROGRESSOR for Metal	Fast through thick and thin	BIM, milled	
special for Alu	Ideal for aluminium, soft and non-ferrous metal	HSS, milled	

White – for wood and metal

The product name describes the characteristics	The features	The blade quality	
PROGRESSOR for Wood & Metal	Universal, fast through thick and thin	BIM, milled	

Black – for special applications

The product name describes the characteristics	The features	The blade quality	
special for Inox	For stainless steel	Tungsten carbide, ground	
special for Fiber & Plaster	For fibre and cement materials	Tungsten carbide, ground	
special for Ceramics	For ceramic materials	Tungsten carbide, RIFF	
special for Soft-Material	Cuts soft materials	HCS, ground	

Quality controlled

for optimum results

HCS

- ▶ Carbon steel for use with softer materials such as softwood, wood fibreboards and soft plastics.

BIM

- ▶ Bi-metal, a highly elastic bond of HSS and HCS to meet the greatest demands. Especially suitable for use in hardwood, abrasive wooden materials, hard plastics, and harder materials such as non-ferrous metal and ferrous metal.
- ▶ The flexible BIM saw blades are used, for example, if there is a risk of shank breakage.
- ▶ They have a lifetime about twice as long as the HSS blades and approx. 10 times longer than HCS blades. This means that they are excellent value for money.

HSS

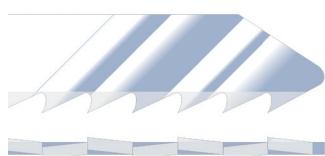

- ▶ Fully hardened high-grade high speed steel for use with harder materials such as metal, aluminium and non-ferrous metal.

Carbide

- ▶ Carbide saw blades are especially powerful and offer exceptionally long lifetime.
- ▶ The carbide teeth eat through glass fibre reinforced plastic, cement-bonded fibreboards or plasterboard.
- ▶ Carbide tooth strips cut stainless steel.
- ▶ A coating with carbide grit (= RIFF) cuts through abrasive materials such as wall tiles or glass fibre reinforced plastic.

The right geometry

is what's important

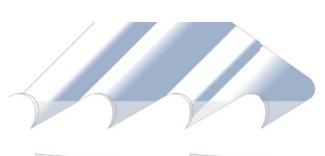

Milled and side set teeth

Blade with relatively rough cut and quick work progress cutting into hard and softwood, aluminium, plastics and non-ferrous metals (e.g. T 111 C, T 345 XF).

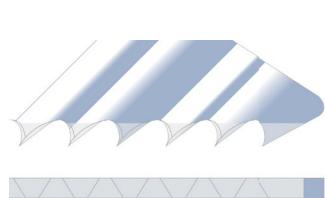

Milled and wavy set teeth

Blade for fine, straight cutting results in plywood, soft steel, aluminium, non-ferrous metals and plastics (e.g. T 119 B, T 118 A).

Ground and side set teeth

Blade for quick cuts in wood (e.g. T 144 D, T 244 D).

Ground and taper ground teeth

Blade with taper ground spine for fine and clean cuts in wood and plastic (e.g. T 101 B, T 234 X).

Jigsaw blades for plastics

Customised for perfectly cut edges in plastic

Overview of applications															
	PP	PE	PC	SB	ABS	PVC	PA	PS	POM	PET	PMMA	CRP	GRP	CORIAN	VARICOR

T 301 CHM Clean for Solid Surface													●●	●●	

•• main application • very well suited ○○ well suited ○ suitable

clean for PP

The tooth strip of the new T 102 D Clean for PP jigsaw blade is optimised for clean cuts in thermoplastics such as polypropylene panels.

- No melting and rewelding

- Molten material does not stick

clean for PMMA

The design and tooth strip of the new T 102 BF Clean for PMMA jigsaw blade are optimised for clean cuts in PMMA (acrylic glass).

- No need to rework cut edges

- Material breakage in brittle plastics is significantly reduced

clean for PVC

The tooth strip of the new T 102 H Clean for PVC jigsaw blade is ideal for clean cuts in PVC panels.

- No continuous chip formation

clean for CarbonFiber

The new T 108 BHM Clean for Carbon Fiber has a ground tungsten carbide strip which ensures longevity.

- Long lifetime in carbon fibre plastics

Speed for Metal jigsaw blades

Unrivalled cutting speed and superior longevity in metal

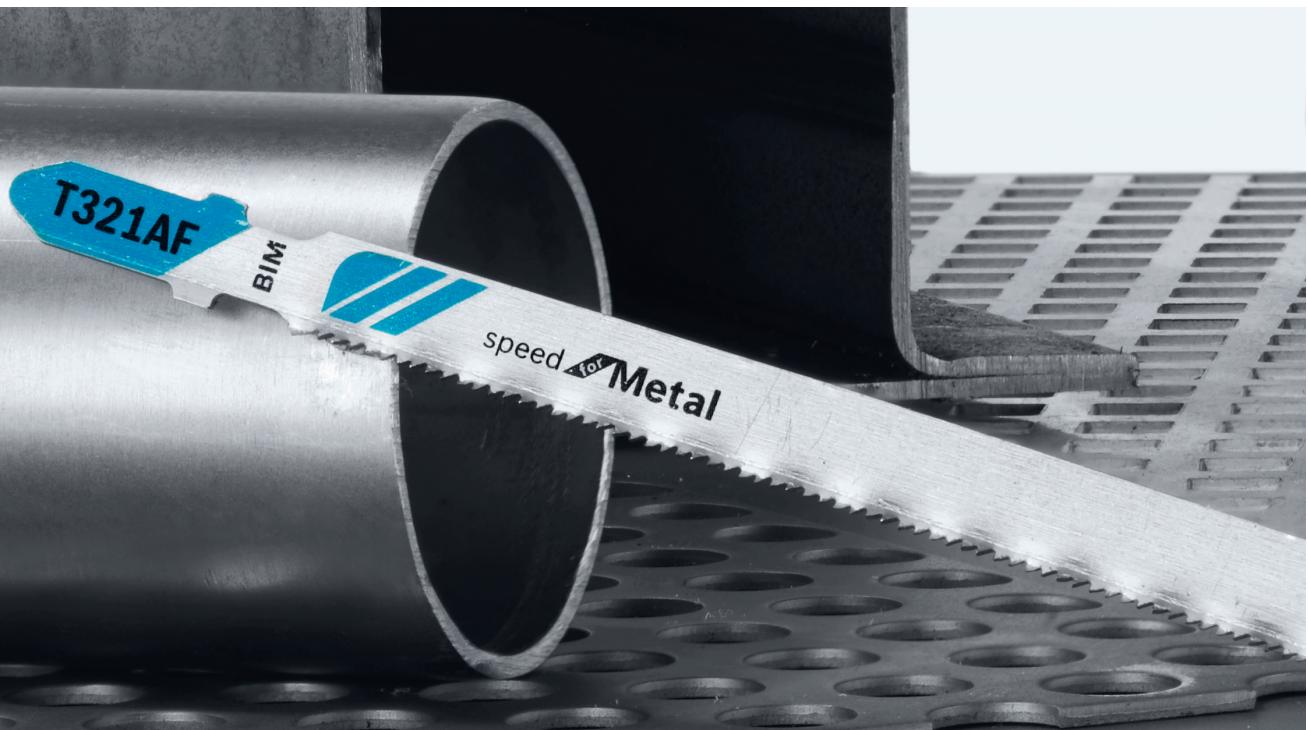

Steel, already the main construction material, is constantly growing in significance. Metal components have to be cut to length or modified to meet the specific size or space requirements on construction sites.

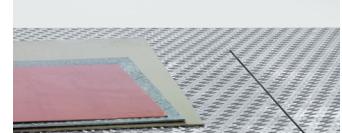

Conventional metal jigsaw blades are often found to be unsatisfactory with regard to their cutting speed and lifetime and therefore do not meet the expectations of professional users. The new jigsaw blades in the Speed for Metal series offer unrivalled cutting speed and superior longevity when cutting metal, e.g. sawing thick perforated sheet metals or thick-walled metal profiles.

We have achieved unsurpassed sawing performance with a metal-optimised material selection and tool design:

- ▶ 50% higher cutting speed
- ▶ Three times the lifetime of conventional jigsaw blades made of HSS steel

**T 121 GF**

For very thin sheet metals

**T 121 AF**

For thin sheet metals and perforated sheet metals

**T 121 BF**

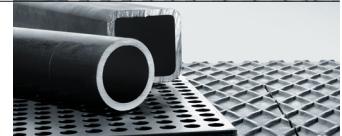

For medium-thick sheet metals and perforated sheet metals

**T 321 AF**

For thin-walled metal pipes and profiles

**T 321 BF**

For thick-walled metal pipes and profiles

Powerful saw blades

make work noticeably easier

The new precision for PVC T 1044 HP is ideal for cutting PVC pipes up to 160 mm in diameter.

Curves in wood core plywood are no problem for the Speed for Wood T 244 D. See page 20.

With the Precision for Wood T 308 BP you can cut kitchen worktops and doors with precise angular accuracy. See page 24.

The new Basic for Inox jigsaw blade T 118 GFS is particularly suitable for working in thin stainless steel sheets. See page 35.

The T 1044 DP precision for Wood can cut thick construction wood up to 160 mm thick. See page 23.

The T 1018 AFP precision for MetalSandwich jigsaw blade can easily perform cutouts for doors/windows in facades. See page 34.

Extra-Clean for Wood

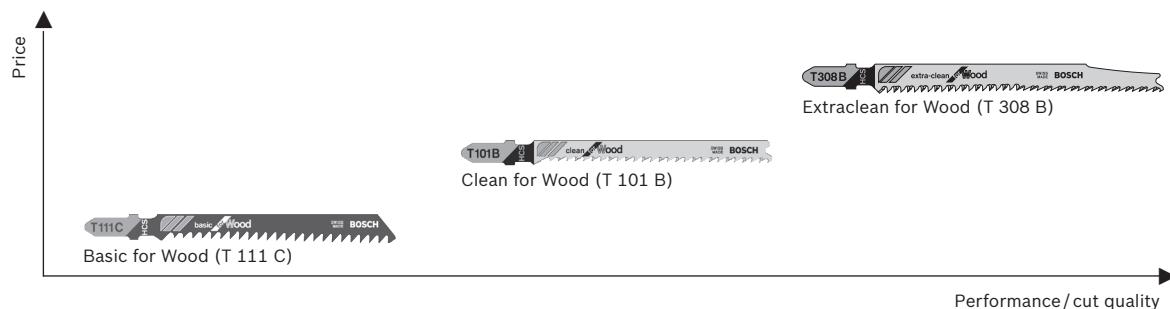

Particularly fine, clean, tear-free cuts on both sides in wood

An absolute first: tear-free, straight cuts on both sides in wood; regardless of whether the jigsaw is guided from above or below. The wood no longer has to be marked from underneath, making incorrect marking a thing of the past. For clean and accurate working with high cutting speed and long lifetime.

The teeth make it all possible: the tooth strip with its revolutionary tooth geometry* results in this exceptional work.

* patent pending

The right jigsaw blade for any requirement

Ideal for adjusting shelves made of softwood.

Accurate cutting of visible end strips.

The T 308 BF is perfectly suitable for working in high-quality panel materials laminated on both sides (HPL layer thickness min. 0.7 mm).

The right saw blade for every application

Extra-Clean for Wood.

Particularly fine, clean,
tear-free cuts on both sides in wood

Optimum cutting action due to integrated pre-cutting function.

No need for time-consuming reworking of the material.

Fatigue-free working: the jigsaw no longer has to be guided from underneath.

Jigsaw blades - Extra-clean for Wood

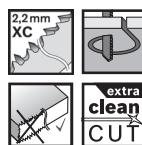

For tear-free cutting

Accessories for jigsaws

Anti-splinter guard for jigsaws

- The anti-splinter guard effectively prevents tearing out on the top of the material. All you have to do is insert it into the sole plate. Another **tip**: it is best to saw with the grain or diagonal to the grain.

Product properties		Ordering information				
		Part number	Packaging type	Pack quantity	Minimum order quantity	Barcode
Anti-splinter guard		2 607 010 079	C1d	5	5	006651

Appropriate for GST 14,4 V; GST 18 V; GST 75 BE; GST 80 Professional; PST 650; PST 650 L; PST 680 E; PST 680 EL; PST 700 PE; PST 800 PEL; PST 900 PEL; PST 1000 CE

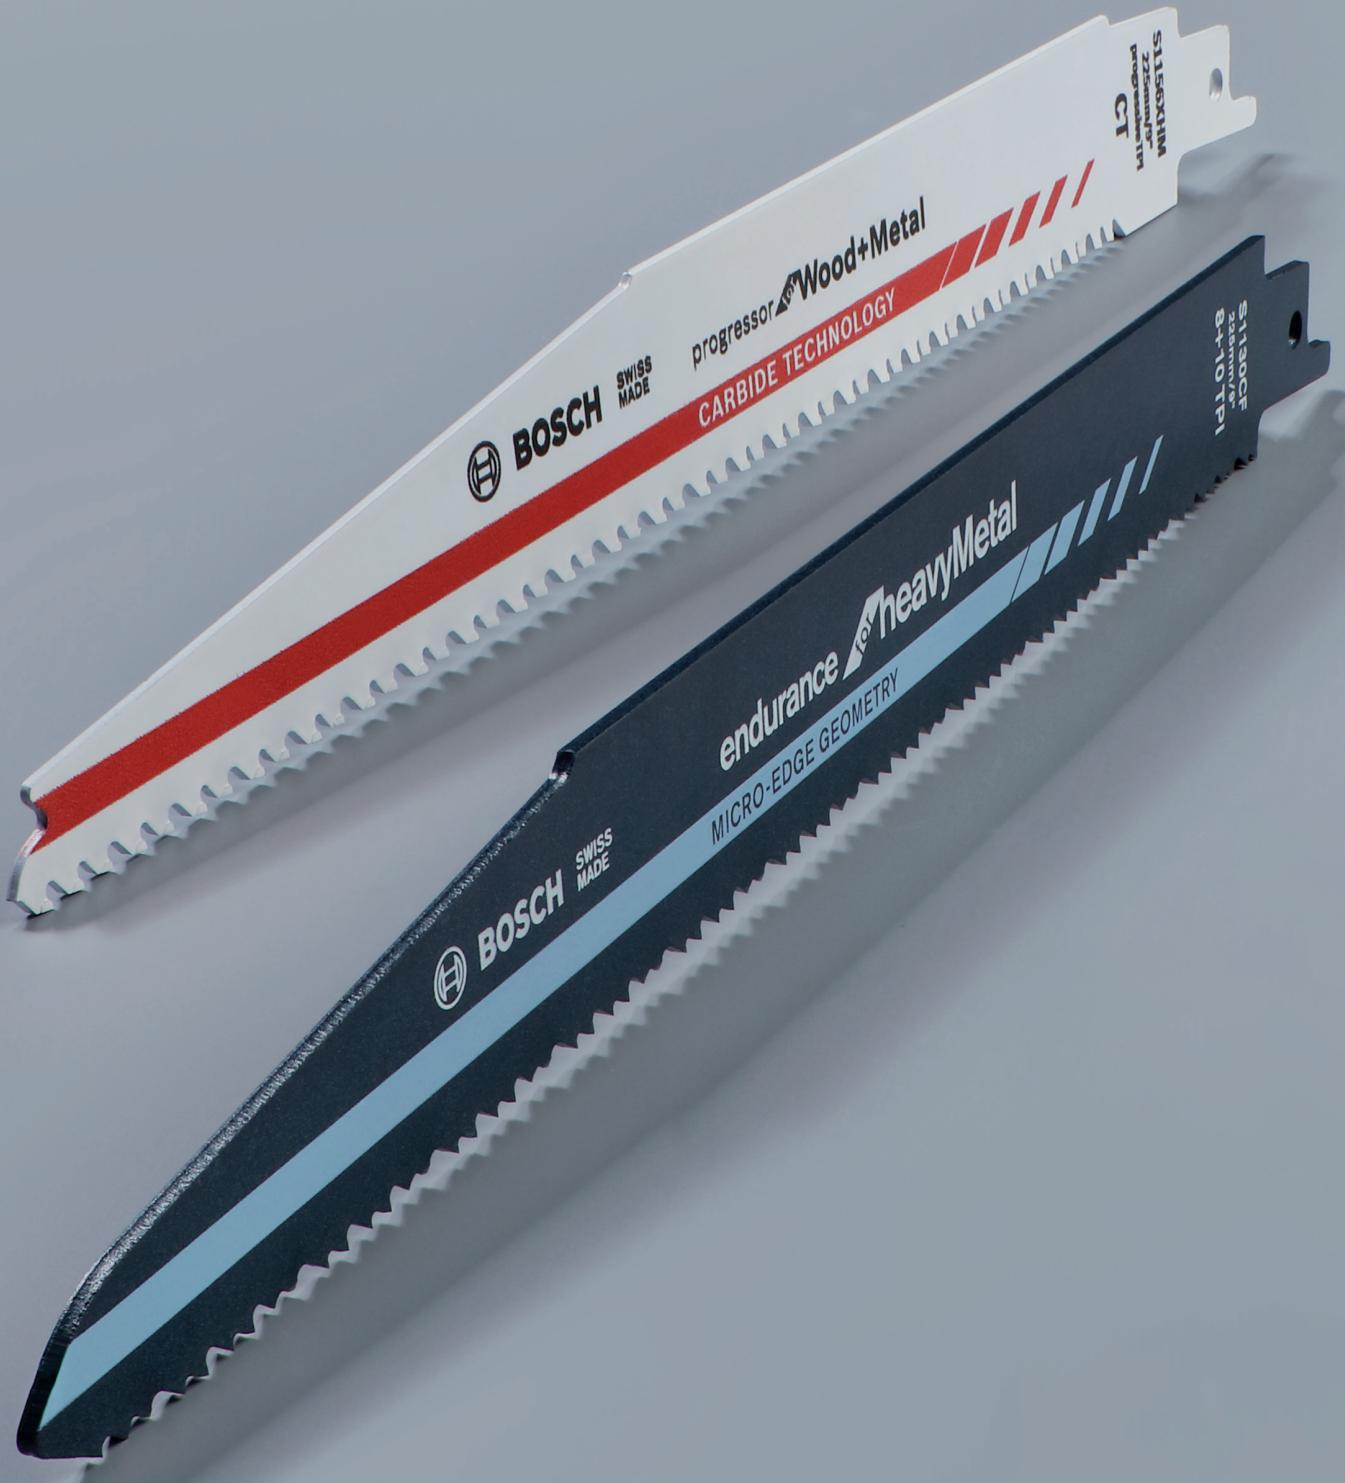

Anti-splinter guard	2 601 016 096	P1d	5	5	516297
Appropriate for GST 150 BCE; GST 150 CE Professional					

Universal cutting oil

- Universal cutting oil in a spray can increases the lifetime of the tool by up to +30%, whilst also increasing the cutting speed.

Universal cutting oil	2 607 001 409	M0b	1	1	271240
Use of the universal cutting oil increases the operational life several times over when cutting metal					

Sabre sawing

The Bosch saw blade alloys

with coordinated quality for an optimum result

HCS

- ▶ Carbon steel for use in softer materials such as wood, wood fibreboards and soft plastics.

Carbide

- ▶ Saw blades for the longest lifetime in high-alloy, hardened and stainless steel and abrasive materials such as cast iron pipes, glass fibre reinforced plastics, porous concrete, brick and fibre cement panels.

BIM

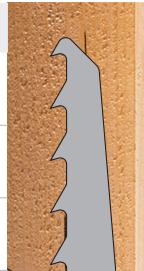

- ▶ Bi-metal, a highly flexible, unbreakable bonding of HCS and HSS, with an extremely resistant base blade for a long lifetime.

Diamond

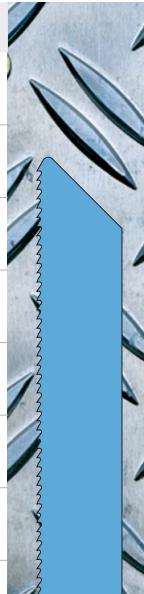

- ▶ Diamond-coated sabre saw blades specially for cutting cast steel pipes and very abrasive materials such as fibre reinforced plastics.

Grey – for hard and soft wood

The product name describes the characteristics	The features	The blade quality	
basic for Wood	Good and cost-effective	HCS, milled	
PROGRESSOR for Wood	Fast through thick and thin	HCS, ground	
top for Wood	Fast and efficient	HCS, ground	

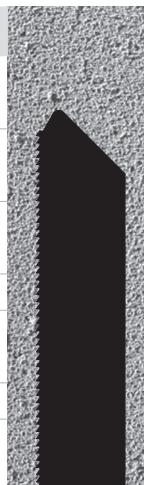

Blue – for metal

The product name describes the characteristics	The features	The blade quality	
basic for Metal	Good and cost-effective	BIM, milled	
flexible for Metal	Breakproof, long lifetime	BIM, milled	
PROGRESSOR for Metal	Fast through thick and thin	BIM, milled	
heavy for Metal	Sturdy and precise	BIM, milled	
endurance for heavyMetal	Long lifetime in metal	BIM, Micro Edge Geometry	
basic for CastIron	For cast materials	Carbide Technology	
endurance for CastIron	Longest life in cast materials	Diamond, coated	
endurance for StainlessSteel	Longest life in stainless steel	Carbide Technology	

White – for wood and metal

The product name describes the characteristics	The features	The blade quality	
flexible for Wood+Metal	Breakproof, long lifetime	BIM, milled	
progressor for Wood+Metal	Longest life in wood/metal demolition	Carbide Technology	
PROGRESSOR for Wood and Metal	Fast through thick and thin	BIM, milled	
heavy for Wood and Metal	Sturdy and precise	BIM, milled	

Black – for special applications

The product name describes the characteristics	The features	The blade quality	
special for Plaster	For plasterboard	BIM, milled	
special for Ice	For frozen material	Stainless steel, milled	
endurance for FiberPlaster	Longest life in fibre-cement and drywall panels	Carbide Technology	
endurance for AeratedConcrete	Longest life in porous concrete	Carbide Technology	
special for Soft-Material	For soft materials	HCS, blade	
endurance for Brick	Longest life in brick	Carbide Technology	
clean for FiberInsulation	For fibre insulation materials, polystyrene, cardboard, carpet, leather	HCS, serrated edge	

Carbide Technology –

Always the right blade for the toughest applications

	Application	Specifications
Progressor for Wood and Metal		
	Wood with soft nails	Rm < 800 MPa
	Wood with hardened nails	Rm > 800 MPa
	Wood with soft screws (e.g. property class 6.8)	Rm < 800 MPa
	Wood with hardened screws (e.g. property class 10.9)	Rm > 800 MPa
	Wood with inox screws	Rm > 800 MPa
	Sandwich material (wood with steel sheet)	Rm < 450 MPa
	Sandwich material (wood with inox sheet)	Rm 450–750 MPa
Endurance for Stainless Steel		
	Non-alloyed structural steel with low strength (St37/S235)	Rm < 450 MPa
	Non-alloyed structural steel with higher strength (e.g. St52/S355)	Rm 450–650 MPa
	Non-alloyed tempered steel (e.g. C45)	Rm 650–850 MPa
	Alloyed tempered steel (e.g. 34CrNiMo6)	Rm 850–1000 MPa
	Austenitic steel of type V2A (e.g. X5CrNi18-10)	Rm 450–750 MPa
	Austenitic steel of type V4A (e.g. X2CrNiMo17-13-2)	Rm 450–750 MPa
	Super austenitic steel (e.g. X1NiCrMoCu25-20-5)	Rm 500–750 MPa
	Duplex steel (e.g. X2CrMnNi21-5-1)	Rm 600–900 MPa
Basic for Cast Iron		
	Cast iron (ductile cast iron, nodular cast iron)	Rm < 800 MPa
	S 1130 RF	
Endurance for Fiber Plaster		
	Cement-bonded fibreboard (e.g. Duripanel)	~1250 kg/m³
	Fibre-cement facade panels (e.g. Eternit facade panel)	
	Plasterboard (e.g. original Rigips)	without cellulose fibre
	Plasterboard (e.g. original Fermacell)	with cellulose fibre
	Insulation panel with cement fibre overlay (e.g. Wedi panel)	
	S 641 HM	
Endurance for Aerated Concrete		
	Porous concrete (e.g. Ytong, Siporex)	Pressure resistance < 10 N/mm² Bulk density (dry) < 700 kg/m³
	S 1141 HM S 1241 HM S 2041 HM	
Endurance for Brick		
	Vertically perforated brick (e.g. Poroton)	Pressure resistance < 20 N/mm²
	Solid brick (e.g. red brick)	Pressure resistance < 20 N/mm² lightly fired (900°C)
	Clinker brick	Pressure resistance > 28 N/mm² heavily fired (1200°C)
	Slag stone	~2700 kg/m³
	Bernese sandstone	~2200 kg/m³
	Gypsum	> 680 kg/m³
	Mortar	
	S 1243 HM S 1543 HM S 2243 HM	

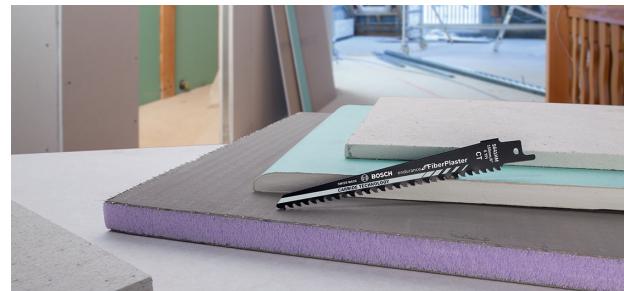

Carbide Technology –

Harder than the hardest materials

Tough materials such as stainless steel or hardened, high-alloy screws are increasingly being used in construction. It is extremely difficult to cut through wood containing such metal parts. Until now there has not been a practical method of performing this work efficiently. Sabre saw blades made of bi-metal immediately reach their limits. The new sabre saw blades with Carbide Technology effortlessly cut through high-alloy, hardened and stainless steel, cast iron pipes and cast steel, glass fibre reinforced plastics, wood with metal, drywall materials, porous concrete and brick. The perfect solution for demolition work.

- ▶ Longest life in wood with metal
- ▶ Even cuts wood with high-alloy, hardened screws/nails or fasteners made of stainless steel.

- ▶ Longest life in drywall materials, e.g. Fermacell panels, Duripanel, plasterboard

- ▶ Longest life in high-alloy, stainless steel and hardened tempered steel

- ▶ Longest life in porous concrete, e.g. YTONG and SIPOREX blocks

- ▶ Longest life in cast steel/cast iron, e.g. ductile cast iron, nodular cast iron

- ▶ Longest life in brick and red brick e.g. Poroton

Powerful saw blades

make work noticeably easier

Sabre saw blades in the BEF series are ideal for precise cuts at accurate angles in thin-walled metal profiles.

Metal sabre saw blades in the VF series are especially suitable for demolition work.

Controlled, powerful coarse cut. The Heavy for Metal S 920 CF offers you angular accuracy when cutting not only in metal construction, but also when cutting heavy profiles. This low-vibration saw blade is ideal for use with a pipe cutting device.

Endurance for HeavyMetal saw blades with new 3x3 tooth geometry are ideal for metal demolition work.

With the Heavy for Wood and Metal sabre saw blades, you can simply cut through anything you come across on the construction site: wood with nails, frame profiles made of wood with metal, plastic pipes and profiles. Ideal for demolition work.

Special for PalletRepair sabre saw blades are optimised especially for repairing pallets. The “reverse tip” noticeably increases lifetime.

Serrated sabre saw blades allow for effortless, precise cuts in fibre insulation panels. The shorter saw blades S 1113 AWP and S 1213 AWP are ideal for precise plunge and curve cutting.

The right saw blade for every application

Heavy for Metal sabre saw blades for top performance in metal

Extremely robust and durable

- ▶ Double the lifetime
- ▶ Considerably increased cutting speed (each in comparison to standard bi-metal blades)

Robust tooth

Small tooth spacing, small chip clearance for double the lifetime thanks to strengthened tooth spine

Aggressive teeth

- ▶ Patented 2x2 tooth geometry
- ▶ Powerful in thick-walled and thin-walled pipes and profiles

Aggressive tooth

large tooth spacing, large chip clearance for high cutting speed and high chip removal rate.

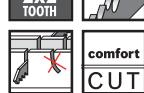

Sabre saw blades - Heavy for Metal

Heavy-duty work, sturdy, precise

The new standard in metal sawing

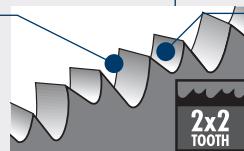

The patented Full Contact Design increases the lifetime of the tried-and-tested "endurance for HeavyMetal" sabre saw blades by 50%. The concave tooth strip makes it noticeably easier to start sawing metal pipes. The patented 2x2 tooth geometry provides a high material removal rate in metal.

Straight cutting edge

- Less vibration
- Effective, smooth and precise cutting of large-diameter pipes and profiles.

Aggressive tooth
Large tooth spacing,
large chip clearance
for high cutting
speed and high chip
removal rate

Robust tooth
small tooth spacing,
small chip clearance for
long lifetime thanks to
strengthened tooth spine

Patented
"Full Contact" Design

- An easier sawing start
- Higher cutting speed
- Optimised for sawing metal pipes

Sabre saw blades - Endurance for HeavyMetal

Longest life in metal

Accessories for multi-cutters

Starlock from Bosch

The new system standard

A **system standard** has been created to offer all users worldwide one **consistent mounting system for multi-tools**: Starlock, the **threedimensional SDS quick-clamping system**. Fast. Direct. Strong.

- ▶ **Maximum power transfer** due to tight-fitting connection of machine and Starlock accessory
- ▶ **Highest working speed** with maximum precision and control
- ▶ **Backwards compatibility** with all OIS and OIS-compatible power tools from Bosch, Fein, AEG, Hitachi, Makita, Metabo, Milwaukee, Ryobi, Skil and others
- ▶ **Highest availability** of accessories thanks to new system standard
- ▶ **Fastest accessory changing** within 3 seconds and with no risk of injury because the accessory no longer has to be touched with the hand when fitting and ejecting it
- ▶ **Optimum work result** because power tool and accessory are perfectly coordinated with each other

The accessories are divided into **three performance categories: Starlock, Starlock Plus and Starlock Max**. They therefore only fit suitable machines, ensure optimum power transfer and prevent power tool overload. Starlock accessories fit all Starlock power tools and virtually all other conventional multi-cutters. Starlock Plus blades are especially suitable for deep cuts, and Starlock Max blades are especially suitable for the most demanding applications (Heavy Duty).

■ Multi Material ■ Wood ■ Grout and Abrasive ■ Metal ■ Wood and Metal

Unique colour coding system for easy selection of the right blade both at the point of purchase and in your toolbox!

Curved-Tec precision plunge-cutting saw blades

Unique technology with rounded (convex) cutting edge

Rounded (convex) cutting edge in combination with the **new Starlock system** and a **tapered base body** – this unique Bosch technology provides the best precision plunge-cutting blades for wood, hardwood and wood/metal applications. The new Curved-Tec precision plunge-cutting saw blades enable you to perform precise, controlled and jolt-free, smooth plunge cuts. Increased lifetime thanks to less tooth breakout than that of conventional, straight cutting edges.

Precise plunge cuts in hardwood,
e.g. sunken installation of a lamp in
decking

Precise plunge cuts in wood or MDF,
e.g. cutouts in a skirting board

Precise plunge cuts in wood,
e.g. cuts in construction wood

30 × longer lifetime

MetalMax plunge-cutting saw blades with Carbide teeth for demanding metal applications

The plunge-cutting saw blades with Carbide teeth have an exceptionally long lifetime. The high-quality carbide tooth strip makes the saw blades especially **wear-resistant in demanding metal applications**, e.g. hardened screws, nails or stainless steel. The plunge-cutting saw blades with Carbide teeth are also ideal for severely abrasive materials, e.g. epoxy resin/glass fibre reinforced plastic, plasterboard, porous concrete, etc.

Cutting hardened screws and nails

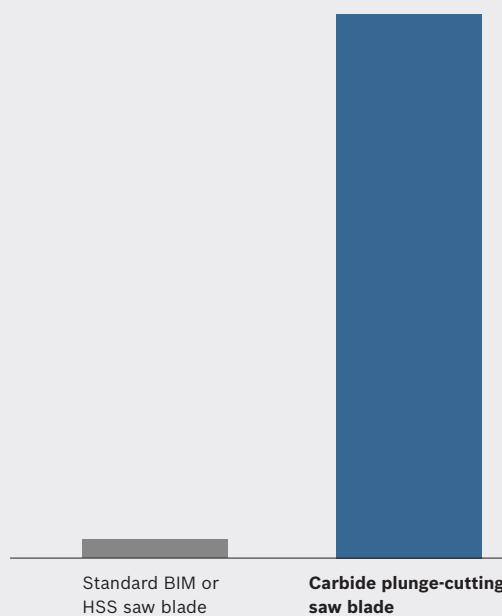

Cutting metal components,
e.g. nails, reinforcement

Deep plunge cuts in porous
concrete, e.g. hole for a socket

With a **30 × longer lifetime** than normal BiM or HSS saw blades, the MetalMax plunge-cutting saw blade is the perfect solution for demanding metal applications!

Over 30 × longer lifetime in metal

Tests by Bosch. Hardened screws.

Accessories for multi-cutter power tools –

Perfect trimming, adjusting and repairing

The Bosch Starlock accessories for multi-cutter power tools are versatile due to their oscillating motion. Sawing, routing, rasping, cutting, scraping, sanding and polishing – now you can also get the right accessories for **hard-to-reach areas** and **the most demanding applications (Heavy Duty)**. The three performance categories **Starlock**, **Starlock Plus** and **Starlock Max** always ensure **maximum power transfer** from the machine to the accessory.

For time-saving and precise work with multi-cutter power tools from virtually all conventional brands due to the backwards compatibility of Starlock.

Trimming and adjustment work

Bosch Starlock accessories work with precision right into the angle. Ideal for recesses and deep plunge cuts in wood, abrasive wooden materials or plastics.

Flooring work

Whether door frame, parquet, laminate, carpet residues or mouldings – Bosch Starlock accessories make quick and easy cuts everywhere. For example, you can use them to cut a door frame to length at floor level in no time, make cutouts in parquet and laminate in an instant, and shorten skirting boards in the blink of an eye.

Tile or bathroom renovation

Bosch Starlock accessories make light work of even the hardest materials. Their applications range from routing grout, to removing mortar or tile adhesive, to cutting a new cable duct in the wall.

Sanding

The multi-cutter delivers the best results in areas other tools cannot reach. Starlock accessories from Bosch make it easy to sand wood, paint, metal, stone and varnish in hard-to-reach areas, e.g. in automobile and boat building or in staircase and flooring work.

For all work with insulation materials and sealants

The universal joint cutter is especially suitable for removing expansion joints and window putty. The serrated segment blade in BIM quality cuts insulation and other soft materials easily and precisely.

Automobile construction and ship building

Bosch's Starlock accessories for multi-cutters also provide solutions for work on land and at sea. From sawing work in epoxy and fibreglass parts through to polishing in inaccessible areas.

Trimming and adjustment work

The professionals for working in tight spaces

Bosch Starlock accessories work with precision right into the angle. These plunge-cutting saw blades enable you to saw in the tightest of spaces – even in areas close to floors and walls. Especially the new Starlock Plus and Starlock Max wood/metal plunge-cutting saw blades PAIZ 32 APB and MAIZ 52 APB are suitable for these demanding jobs because they can also perform **especially deep cuts** with ease.

The bi-metal and carbide saw blades are just as unstoppable in metal as they are in furniture components, for example to enable access to sockets.

Sanding

The solution for the most difficult sanding applications

The Bosch Starlock accessories enable you to effortlessly sand corners, gaps and also surfaces. Their **high material removal rate and easy handling** ensure the best results, e.g. when sanding parquet in corners, without any kick-back effect at all. You also work **dust-free at all times** thanks to the dust extraction.

For delta sanders, there is a large selection of matching Bosch sanding paper for wood, paint and composites.

Model	Part no.
AVZ 93 G	2608000493
AUZ 70 G	2608662346

With the delta sanding plate you can sand in all corners and on all edges without kick-back effect.

The sanding finger also gets into tight gaps, e.g. in shutter louvres.

Quickly and comfortably sand round surfaces with the profile sander, e.g. stair-rails up to a diameter of 55 mm.

Parquet sanding in hard-to-reach areas, e.g. small niches

For all work with insulation materials and sealants

The experts for clean and quick cuts in soft materials

Bosch's Starlock accessories provide a versatile range of applications for all types of work involving insulation materials and sealants.

With the universal joint cutter you can cut out expansion joints quickly and efficiently, with **20,000 cuts per minute**.

Demanding applications (Heavy Duty) such as **cuts through soft expansion joints** are no problem for the new Starlock Max blades MATI 66 SC, MAII 32 SC and MAII 32 SLC.

The AIZ 28 SC cutting blade is available as a solution in the lower Starlock performance category.

Model	Part no.
AIZ 28 SC	2608661691
MAII 32 SC	2608662583
MAII 32 SLC	2608662575

Automobile construction and ship building

The specialists for sawing, sanding and polishing work on land and also at sea

Bosch's Starlock accessories for multi-cutters also provide solutions for work on land and at sea. Bosch offers the right multi-cutter accessory for every application range.

Effortlessly cut perfectly clean recesses in epoxy and fibreglass (e.g. cover panels) with the BiM-TiN segment and round saw blades or with the new carbide plunge-cutting saw blades.

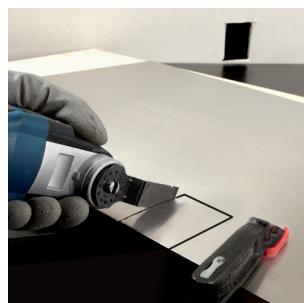

Model	Part no.
ACZ 85 EIB	2608661758

The right speed affects the quality of the hole and, together with the right cooling, increases the lifetime.
More on page 154.

The Power Change adapter technology:

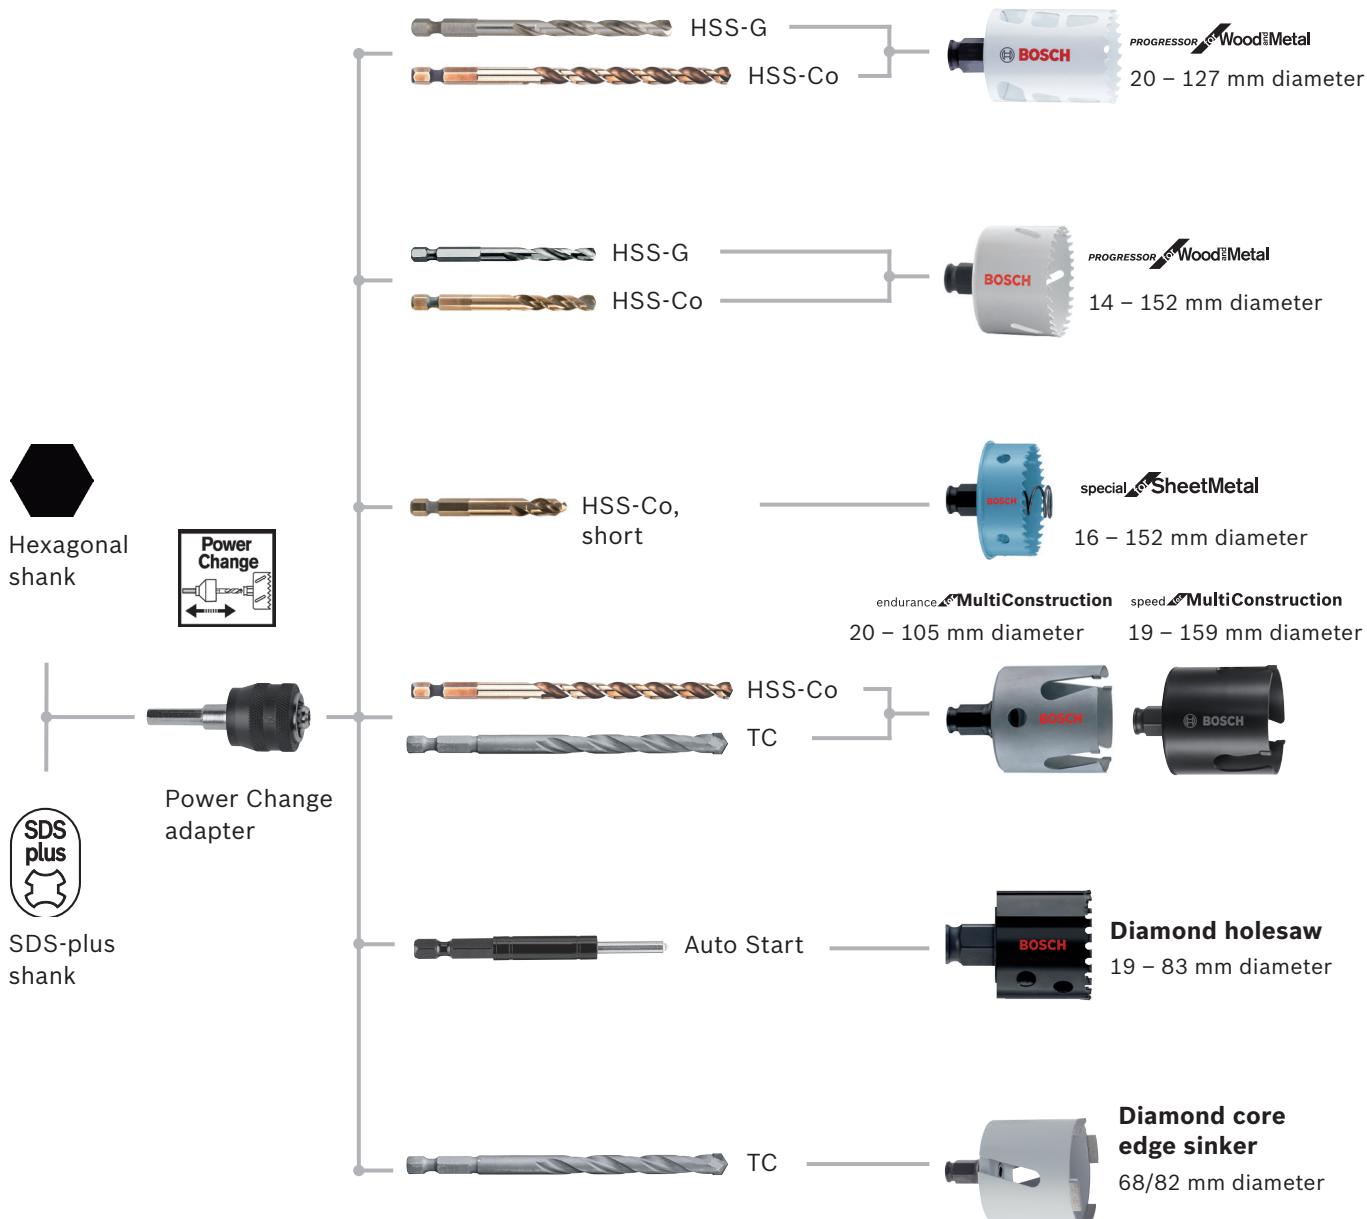

one adapter for all diameters

Tool-free changing of pilot drill bit and holesaw

All it takes is a click! Bosch has developed the unique “Power Change” adapter system to enable the user to work even more efficiently. It is the only system that allows the holesaw and the pilot drill bit to be changed without tools, and the only system that can mount the entire holesaw range with only one adapter.

Core removal made easy

The core is effortlessly removed by tilting the pilot drill bit

The right accessory for every Power Change holesaw

Recommended work safety:

Wear protective glasses, protective mask and ear protectors

Wear protective gloves

You will find a comprehensive range of protective glasses and protective gloves in Segment Catalogue No. 1 starting on page 309.

Speed recommendation

To get optimum holesaw lifetime, please use the recommended speeds below. The speed affects the quality of the hole.

Bi-metal

Diameter in mm	Wood, PVC, rpm	Steel, rpm	Aluminium, rpm	Stainless steel, rpm	Diameter in inches
14 – 25	3000 – 2700	550 – 350	900 – 525	300 – 175	9/16 – 1
27 – 51	2700 – 2000	325 – 170	480 – 255	160 – 85	1.1/16 – 2
52 – 76	2000 – 1800	165 – 115	240 – 170	80 – 55	2.1/16 – 3
79 – 102	1500 – 1000	110 – 85	165 – 130	55 – 40	3.1/8 – 4
105 – 210	1000 – 500	80 – 40	120 – 60	40 – 20	4.1/8 – 8.9/32

Tungsten carbide-tipped

Diameter in mm	Wooden boards and chipboards, rpm	PVC, rpm	Masonry, rpm	Tiles, rpm	Diameter in inches
19 – 25	1000	800	800	500	9/16 – 1
27 – 51	1000 – 800	800 – 600	800 – 700	500 – 400	1.1/16 – 2
52 – 76	800 – 600	600 – 400	700 – 600	400	2.1/16 – 3
79 – 102	600 – 400	400 – 300	600 – 300	400 – 300	3.1/8 – 4
105 – 159	400 – 300	300 – 200	300 – 200	300 – 200	4.1/8 – 8.9/32

Diamond

Diameter in mm	Tiles rpm	Limestone, clinker, brick and masonry rpm	Diameter in inches
14 – 25	1200 – 800		9/16 – 1
27 – 51	900 – 500		1.1/16 – 2
52 – 76	800 – 400	2000	2.1/16 – 3
79 – 102	500 – 150	2000	3.1/8 – 4

Application examples by diameter and user

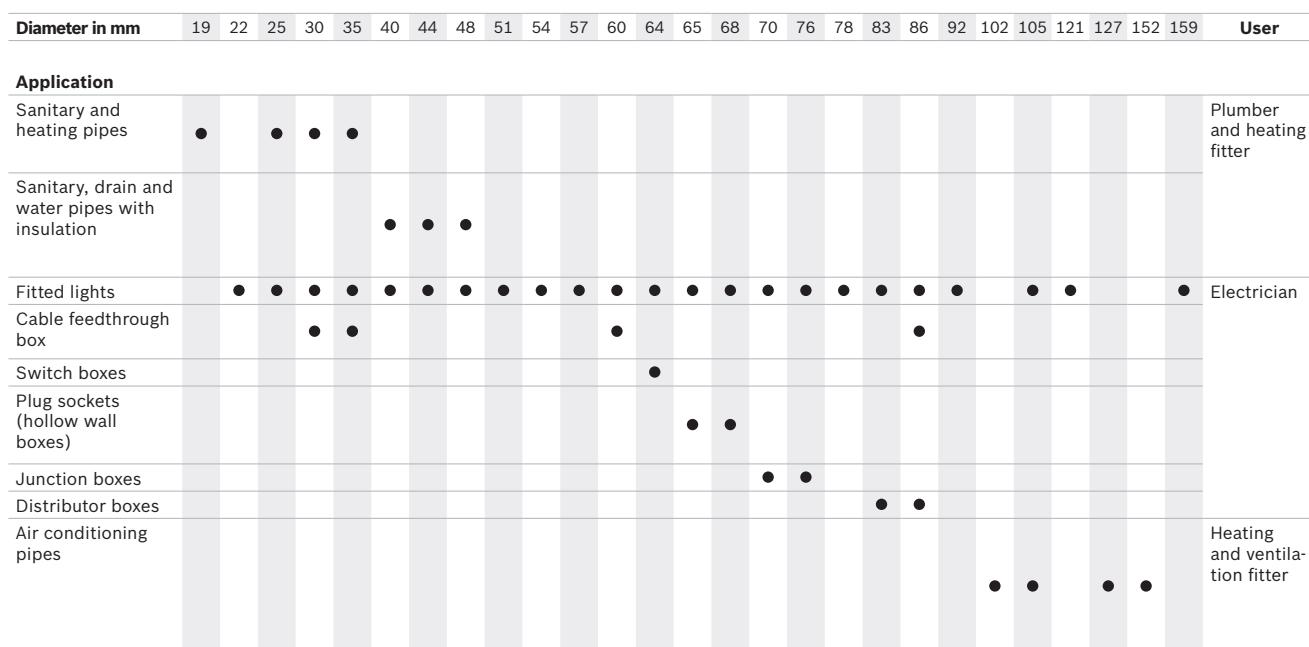

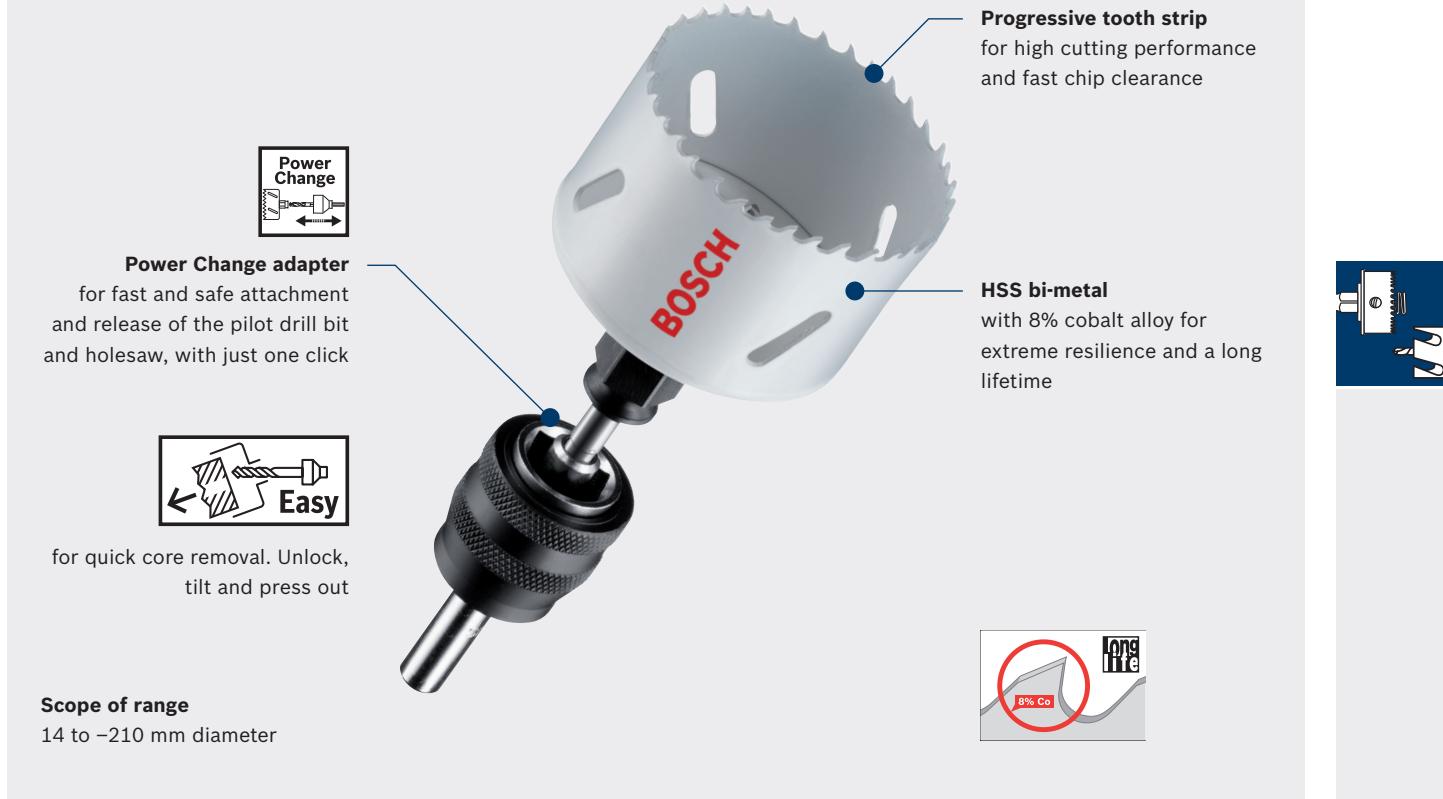

Illustration is a general overview. It may vary from country to country.

Progressor for Wood and Metal

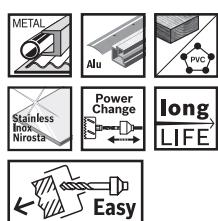

For the toughest demands. Quickly and steadily through a wide variety of materials.

Progressor holesaws

- The cutting quality depends on the correct speed and the coolant used (see packaging or overview P. 154).

You will find holesaw sets on page 171-172.

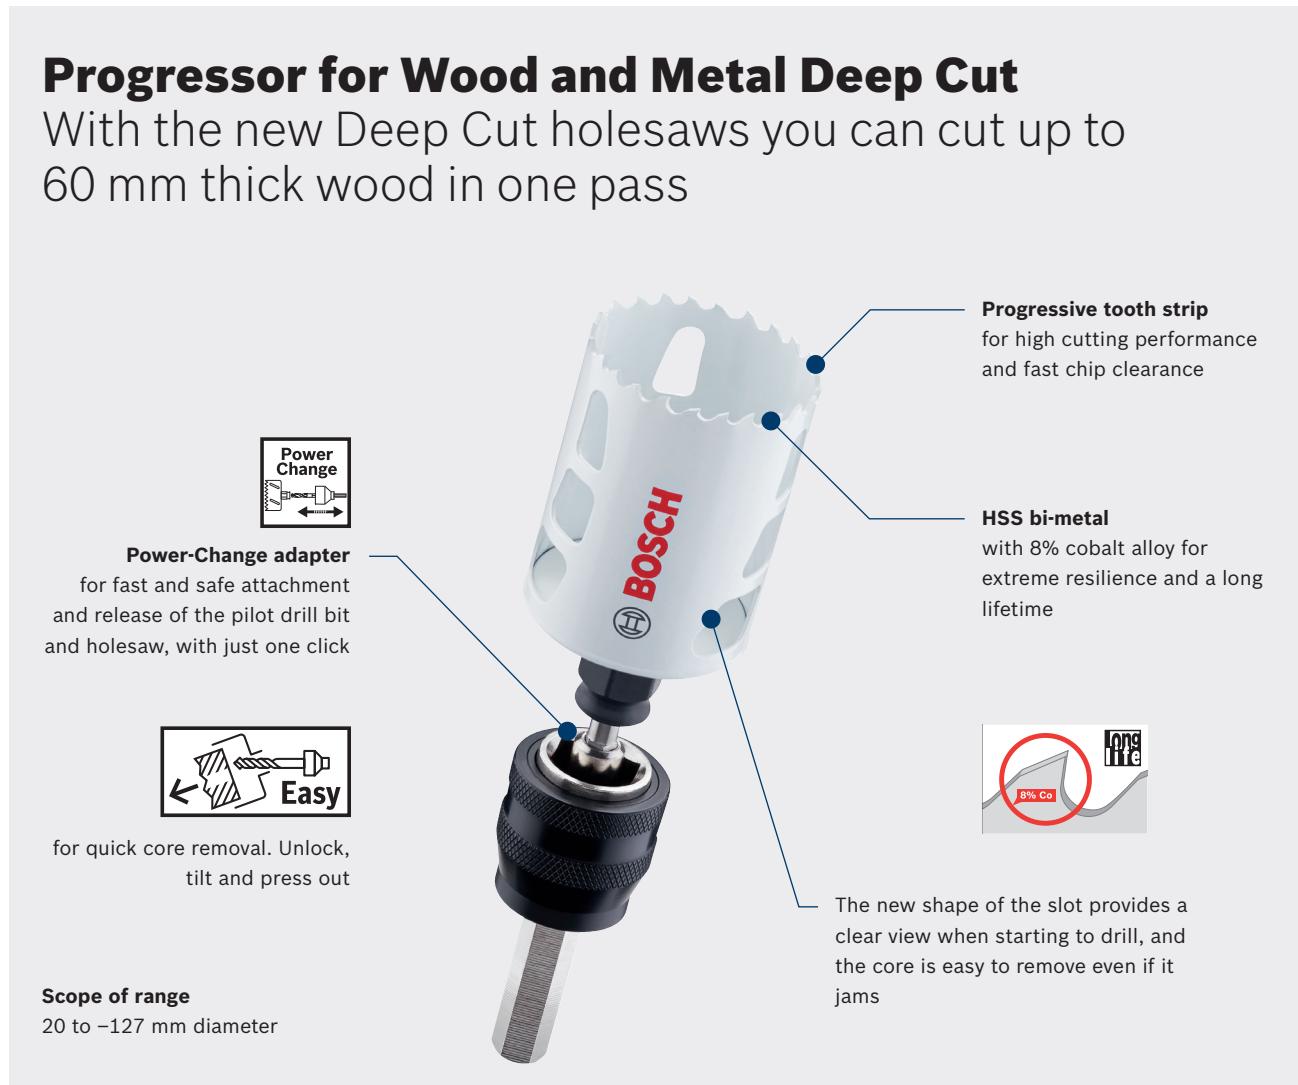

You will find optional accessories for all holesaws on page 173.

For the right holesaw for every application, see page 151.

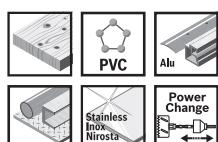

You will find a speed recommendation on page 154.

Progressor for Wood and Metal Deep Cut

With the new Deep Cut holesaws you can cut up to 60 mm thick wood in one pass

Progressor Deep Cut holesaws

- ▶ Saw 60 mm thick wood in one step
- ▶ The cutting quality depends on the correct speed and the coolant used (see packaging or overview P. 154).

Product properties	Total length mm	Part number	Packaging type	Pack quantity	Minimum order quantity	Barcode	
Product properties	Ordering information						
HSS-G pilot drill bit for holesaws with cutting capacity <46 mm with 1/4" hex shank, 135° point angle and split point		104	2 609 390 592	PC1d	1	1	716161

You will find holesaw sets on page 171-172.

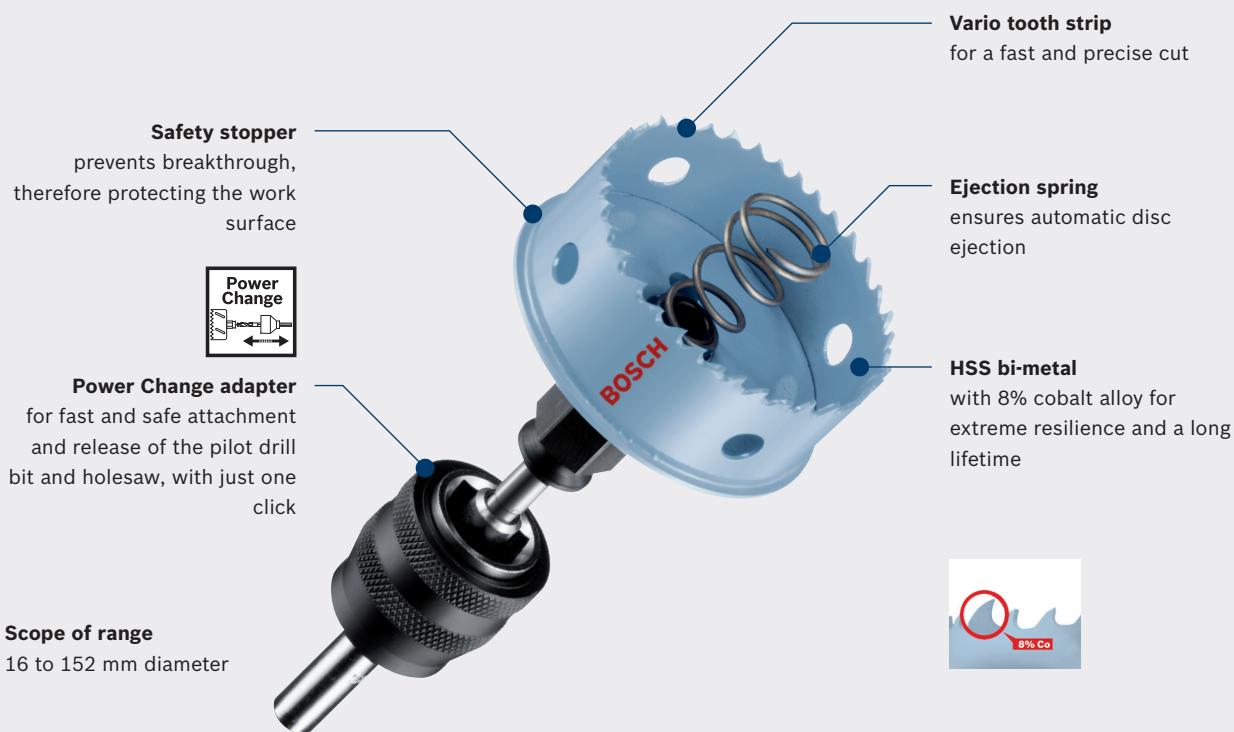

You will find optional accessories for all holesaws on page 173.

For the right holesaw for every application, see page 151.

You will find a speed recommendation on page 154.

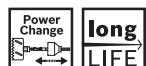

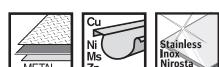

Special for Sheet Metal

The faster holesaw in metal

Sheet Metal holesaws

special for SheetMetal

long
LIFE

- The cutting quality depends on using the correct speed and coolant (see Application on page 151 and Speed recommendation on page 154).
- Ejection spring at diameter of 25 mm or more (16–22 mm diameter are without ejection spring!)

Holesaw set

This case features unique design, functionality & individuality

Bosch case sets have won the “German Packaging Award”.

The transparent lid ensures that you always have a good view of the contents

Attractive, robust design

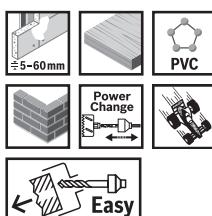

Easy, space-saving storage thanks to fold-in handle

Storage box for adapters and pilot drill bits

The ability to compile your own individual set is another advantage over sets available on the market

Accessories for holesaws

with tool-free quick change adapter

The new adapter for tool-free fitting of standard holesaws is unique on the market. All holesaw diameters (14-210 mm) can be fitted without tools using one adapter. The adapter is available with an 11 mm hex shank and SDS-plus fitting.

Insert the pilot drill bit

Guide the pins
into the holes

Screw in the thread

Lock the cap

Accessories for holesaws

with standard adapter

The adapters connect the holesaws to the power tools. Bosch offers you the right fitting for every drive system. Be it $\frac{1}{4}$ “, SDS-plus or chuck toolholder – you will find it in the Bosch range.

Insert the pilot drill bit.
Fasten with internal hex
screw.

Screw in the thread

Guide the pins into the
holes

Lock the cap with a
screwdriver

The Bosch ordering and packaging control system

The ordering and packaging control system makes it easier to order the right amount and find the packaging type at a glance.

Order quantities are rounded up to the minimum order quantity.

$$2 \times \begin{array}{|c|}\hline : \\ \hline\end{array} = \begin{array}{|c|}\hline \diagup \\ \hline\end{array} = \begin{array}{|c|c|}\hline : & : \\ \hline\end{array}$$

Order quantity PQ MOQ

Order quantities must be a multiple of the minimum order quantity:
3, 6, 9, etc.

$$6 \times \begin{array}{|c|}\hline : \\ \hline\end{array} = \begin{array}{|c|c|}\hline : & : \\ \hline\end{array} \begin{array}{|c|c|}\hline : & : \\ \hline\end{array}$$

Order quantity PQ MOQ MOQ

Example:

Step 1: The packaging type for each part number can be found on the product pages:

2 608 585 781	P1p	1	1	511438

Step 2: An illustration of the corresponding packaging type and specifications about the type of suspension and form of the packaging can be found on the back cover.

P1p Watchbox with Euro hole

P2p Watchbox with other type of suspension

Step 3: What is the structure of a packaging type code?

1 ————— 2
————— C1a ————— 3

1. There are six different material groups which are identified by the initial letter in the English packaging code:

- Packaging made of paper, cardboard or corrugated board (**C**ardboard)
- Plastic packaging (**P**lastic)
- Combined plastic / cardboard packaging (**PC** plastic and **C**ardboard)
- Metal packaging (**M**etal)
- Unpacked product (**U**npacked)
- Wood packaging (**W**ood)

2. Each packaging has one of three different types of suspension:

- 0 without any type of suspension
- 1 with Euro hole
- 2 other type of suspension

3. In the six material groups, each form of packaging is identified by a lower case letter:

C Packaging made of paper, cardboard or corrugated board

- | | |
|-----------------|-------------|
| a Box | d Sleeve |
| b Folded carton | e Hanger |
| c Pocket | f Paper bag |

- | |
|----------------------|
| h Tube |
| k Carton with sleeve |

P Plastic packaging

- | | |
|---------------------|------------------|
| a Box | e Hanger |
| b Bag | f Shrink-wrapped |
| c Pouch | h Tube |
| d Bag with tab card | k Cassette |

- | |
|------------|
| n Sleeve |
| p Watchbox |

PC Combined plastic / cardboard packaging

- | | |
|-------------------|-------------------------|
| a Blister | c Shrink-wrapped carton |
| b Folding blister | d Tight Pack |

M Metal packaging

- | | |
|------------|-----------|
| a Cassette | b Aerosol |
|------------|-----------|

U Unpacked product

- No form specifications

W Wood packaging

- | |
|--------|
| a Case |
|--------|

Packaging

that holds clear information

Packaging made of paper, cardboard or corrugated board (**Cardboard**)

C0a Box without any type of suspension

C1a Box with Euro hole

C2a Box with other type of suspension

C1b Folded carton with Euro hole

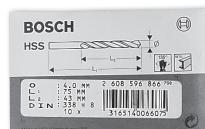

C1c Pocket with Euro hole

C1d Sleeve with Euro hole

C1e Hanger with Euro hole

C0f Paper bag without any type of suspension

C0h Tube without any type of suspension

C2h Tube with other type of suspension

C1k Carton with sleeve and Euro hole

Plastic packaging (Plastic)

P0a Box without any type of suspension

P1a Box with Euro hole

P0b Bag without any type of suspension

P1b Bag with Euro hole

P1c Pouch with Euro hole

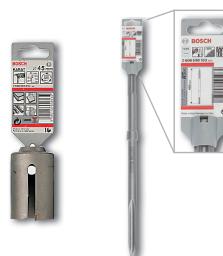

P2c Pouch with other type of suspension

P2a Box with other type of suspension

P1d Bag with tab card and Euro hole

P1e Hanger with Euro hole

P2e Hanger with other type of suspension

P0f Shrink-wrapped without any type of suspension

P1f Shrink-wrapped with Euro hole

P0h Tube without any type of suspension

P1h Tube with Euro hole

P1k Cassette with Euro hole

P0n Sleeve without any type of suspension

P1p Watchbox with Euro hole

P2p Watchbox with other type of suspension

Combined plastic/cardboard packaging (Plastic and Cardboard)

PC1a Blister with Euro hole

PC1b Folding blister with Euro hole

PC1c Shrink-wrapped carton with Euro hole

PC1d Tight Pack with Euro hole

Metal packaging (Metal)

M1a Cassette with Euro hole

M0b Aerosol without any type of suspension

Unpacked product (Unpacked)

U0 Without any type of suspension

Wood packaging (Wood)

W0a Case without any type of suspension

Packaging information system

Technical information/applications

Jigsawing and sabre sawing

Longest lifetime
(Carbide)

Long lifetime
(Bi-metal)

Very clean cut

Clean cut

Powerful, rough cut

Effortless, fine cut

Quick cut

Tungsten carbide-tipped

Carbide-tipped (bar)

Carbide-coated

Knife blade

2x2 Tooth Geometry

Tooth spacing, reverse

Extraclean tooth strip

Tooth spacing

Tooth spacing, progressive

No. of teeth per inch (TPI)
and tooth spacing

Ground, extra-sharp teeth

RIFF grit 30

With pendulum action

For demolition and
rescue work

Round cut, fine

Round cut, coarse

Straight cut, fine

Straight cut, coarse

Tear-free cuts

Accurate angled cut

Angled cut, 90°

Cutting with parallel guide

Flexible blade (bi-metal)
for flush cut

For pipe cutting device

Specially for plunge cutting

Jigsawing and sabre sawing

	Specially for curved cutting with sabre saw blades		Material, thin and thick		Softwood, fine cross cut
	Hardwood, rip + cross, coarse		Hardwood, fine cross cut		Softwood, rip + cross, coarse
	Use coolant, aluminium		Use coolant, inox		

Multi-cutters

	Length/width of plunge-cutting saw blade		Length/width of RIFF plunge-cutting saw blade		Length/width of Scrapers
	Length/width of universal joint cutter		Diameter of segment saw blade		Diameter of RIFF grout and mortar remover
	Diameter of round saw blade		Diameter of RIFF segment saw blade		Blade thickness
	RIFF grit (30) Carbide		Tooth spacing		Tooth spacing
	RIFF grit (50)		Serrated edge		Sharp blade
	Tooth spacing		Delta plate		Sanding plate
	Sharp blade		Deep cut		Heavy Duty
	No sticking				

Multi-cutters

Depth stop for segment saw blades with 100 mm diameter

Depth stop for segment saw blades with 85 mm diameter

Fast work progress

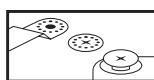

Basic depth stop

Expert depth stop

Very good surface quality

Adapters

Velcro-type fastening system

Safety

Wear protective glasses

Wear dust mask

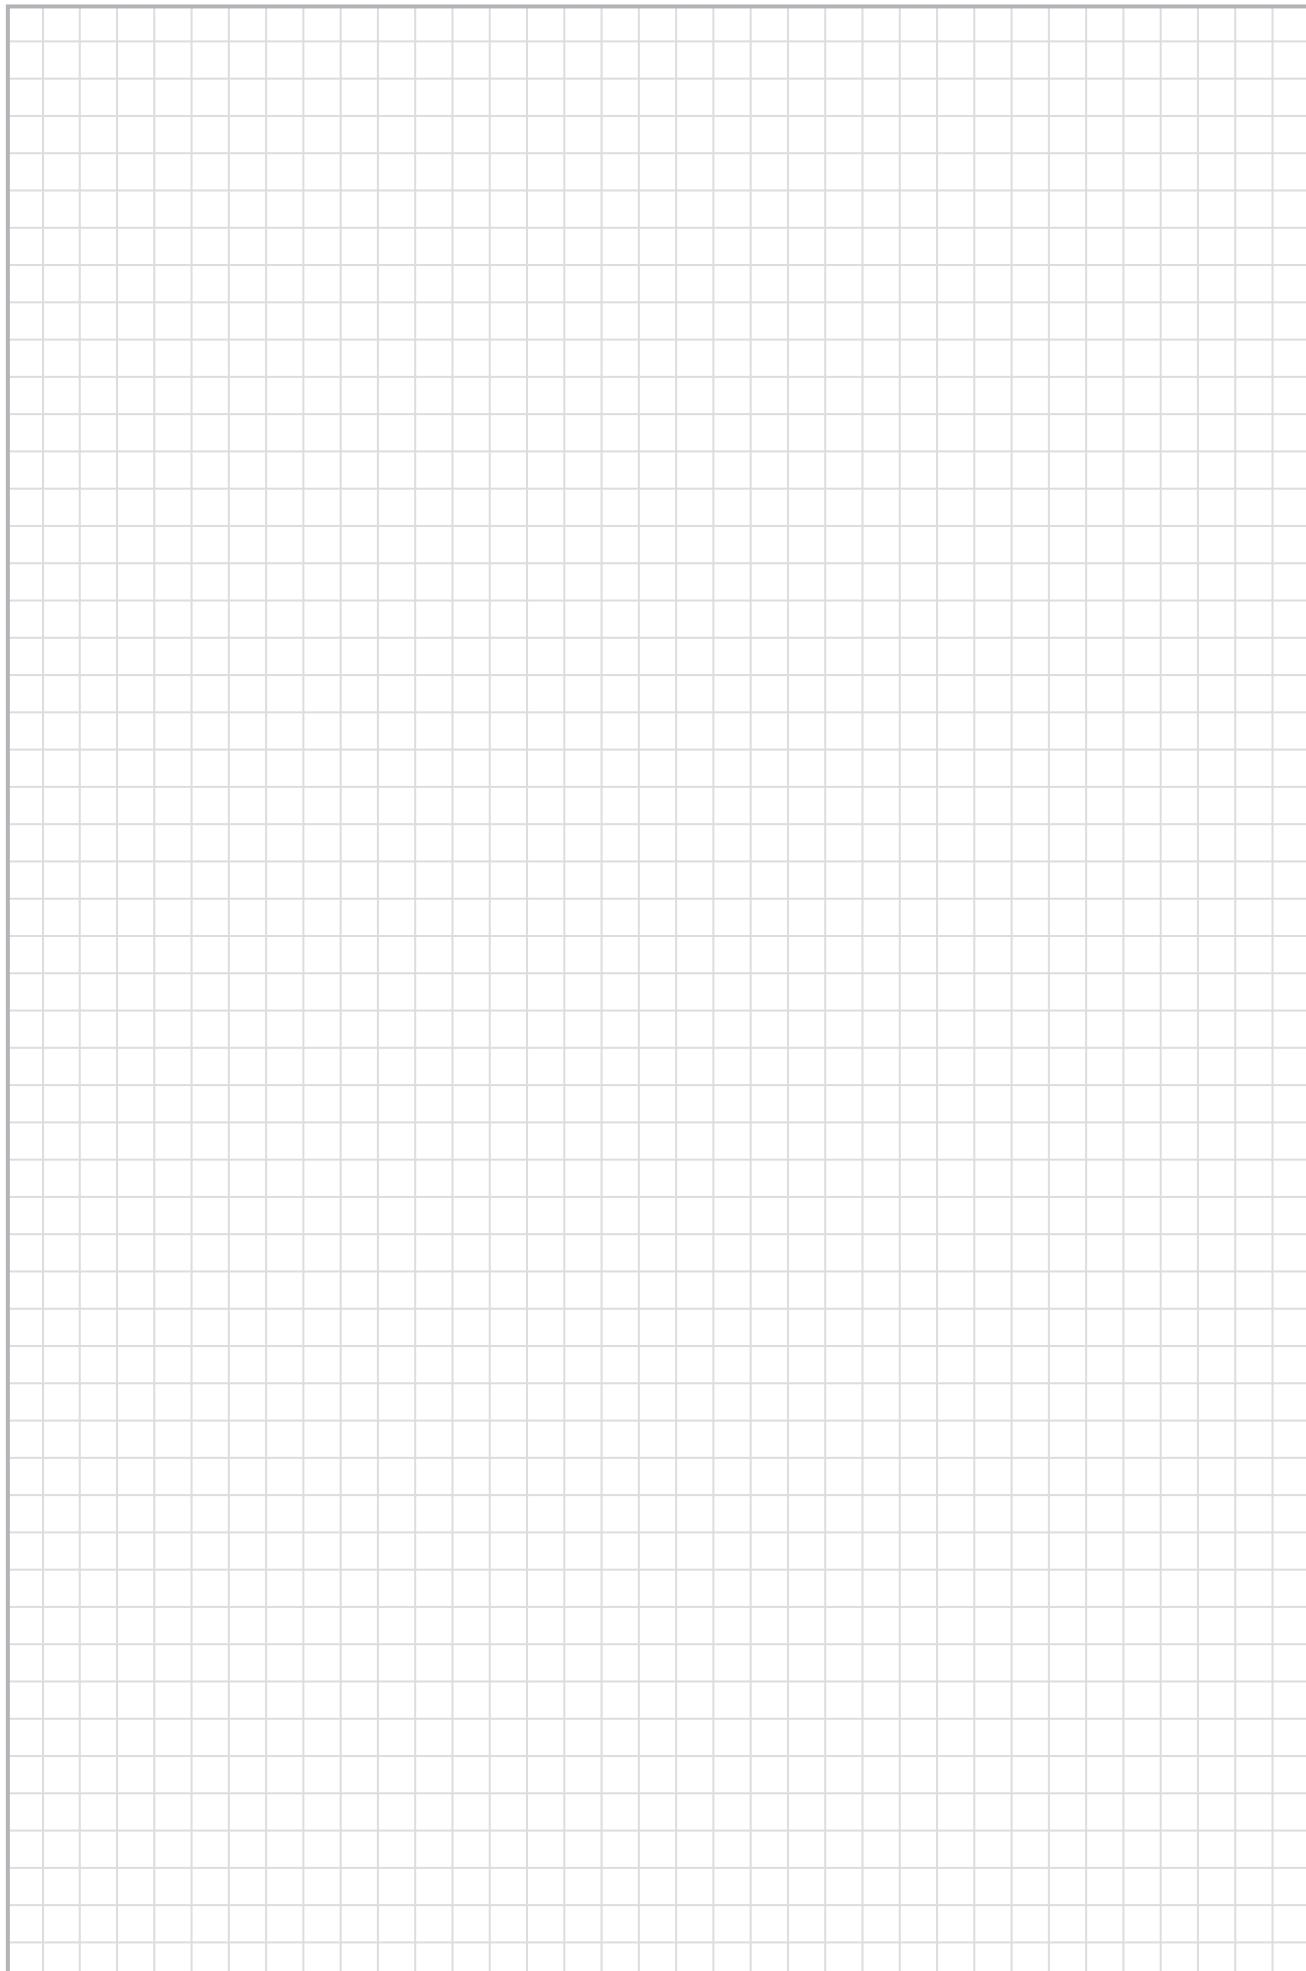

Wear ear protectors

Wear protective gloves

Wear protective shoes
