

Voltage Detection

KT1720

Voltage Detector

- 12, 50, 110, 230, 400V AC/DC voltage steps
- High safety standard CAT IV 600V
- Dual LED indication
- Conforms to GS38 with retractable tip shrouds

Retractable tip shrouds

Protects against inadvertant shorting of terminals.

KEWSTICK UNO

The UNO's latest innovative circuits means better performance.

KEWSTICK DUO

Patent applied for, dual sensitivity Voltage Detector. For reduced sensitivity simply press and hold the attenuation button. It features two colour LED feedback: a heartbeat (a green LED) and voltage detection (a red LED and buzzer).

The Kewstick DUO in attenuation mode can detect between live and neutral when they are only millimetres apart.
