Solid state LEDs

The LED capsule festoon is designed to give a unique combination of great light output, low running costs, and robust construction with rubber cable from end-to-end, it sets this product apart from the more traditional festoons, whilst built-in mounting points remove the need for ceiling hooks or poles.

- Very efficient LED festoon module, reducing running costs
- Heat and glass free makes the units very safe
- Easy access fixing point reduces time of installation
- 2M spacing between light fittings
- Diffused lens reduces light glare

LED Bulb (E56262)

A traditional style festoon with LED ES bulbs fitted, gives you the same level of performance but with the benefits of LED. Plastic bulbs remove the risk of breakages, therefore keeping the lights on for longer with lower replacement costs.

- Kit includes hanging light chain, 10 bulb holders, bulbs and guards
- 10W polycarbonate LED bulbs remove the risk of broken glass
- Fully insulated for indoor and outdoor use
- Fitted with a 16A plug
