

Labgear Distribution Amplifiers with 5G Filtering

A complete new range of boosters and distribution amplifiers with Class 1 filters to prevent interference from 4G and 5G mobile phone transmitters

- Sleek compact modern design
- Class 1 filter removes 703-860MHz, -40dB typical
- 4, 6 and 8 Way models feature separate VHF and UHF inputs
- 6 and 8 Way models feature 17dB full output and line powering for masthead amplifiers
- F Connector outputs ensure secure connections

LDA101K - Single input, 1 x 20dB output signal booster

LDA102K - Single input, 2 x 15dB output signal booster

LDA204K - 2 Input, 4 x 10dB output distribution amplifier

LDA2061K - 2 Input, 6 x 10dB output distribution amplifier

LDA2081K - 2 Input, 8 x 10dB output distribution amplifier
