

DATA SHEET

L2H-ZGBEGWAY

Description

The Link2Home Zigbee Smart Gateway module connects directly to your WiFi with no ethernet cables required. Automate your home and smart devices with considerably lower power consumption than WiFi. Simply install the Link2Home Zigbee Smart Gateway to connect up to 60 compatible devices, such as smart plugs, smart lighting, and home security devices, such as cameras, sensors, alarm systems and other monitoring devices. Convenient and easy to use, Link2Home Zigbee is good for connecting devices with long end points and can achieve a range of up to 100 metres in a straight line and is prone to less interference.

Wi-Fi

Zigbee Gateway

Requires App:

Features

- Input: 5V 1A
- Includes 1M USB Cable
- Working Temp Range: -10°C-55°C
- Protocol: WiFi/Zigbee
- Wireless Standard: IEEE802.15.4/

Dimensions

IEEE 802.11 b/g/n
